- Reporting Tools : Crystal Report, MS-SRS, Actuate & WebFocus.

Crystal Reports Clients / Experience

Financial Client
Senior Developer
- Development Environment: C#, ASP.Net, Web Services, XML, XSLT, Oracle, Windows 2000/3/XP, Crystal Reports

- Design and development of services, components, modules and user interface templates based on the requirement specification.
- Writing technical specification documents for new modules.

Architecture Company
Senior Application Developer

- Development Environment: C#, ASP.NET, ADO.NET, SQL Server 2000, Windows XP/2000/3 and WebFocus.
- Team member of the Portal framework
- Involved in Analysis, Design, development, deployment and fine-tuning of reports in WebFocus
- Was responsible for installing and configuring WebFocus server and client in windows 2K.
- Developed various types of web reports and customization of the existing reports for the specific use using WebFocus.
- Developed web forms and code behind using ASP .NET and ADO .NET.
- Implementing client-side validations using JavaScript
- Debug software and fix defects uncovered during the testing process
- Deployment and setup of the application in UAT environment.

Architecture Company
Senior Application Developer

- Development Environment: C#, ASP.NET, ADO.NET, SQL Server 2000, Windows XP/2000/3
- Collect and analyze requirements and convert them into User Requirement Specification Document.
- Design and development of the data access, business layer and front-end screens.
- Writing technical specification documents.
- Writing scripts for client side form validation using JavaScript.
- Deployment and setup of the application in UAT environment.

Architecture Company
Senior Application Developer

- Development Environment: C#, ASP.NET, ADO.NET, SQL Server 2000, Windows XP/2000/3
- Collect and analyze requirements and convert them into User Requirement Specification Document.
- Design and development of the data access, business layer and front-end screens.
- Writing technical specification documents.
- Writing scripts for client side form validation using JavaScript.
- Deployment and setup of the application in UAT environment.
- Wrote T-SQL Stored procedures.
- Used ADO.Net to store and retrieve data from SQL Server
- Implementing client-side validations using JavaScript
- Troubleshoot and resolve problems with applications

- Debug software and fix defects uncovered during the testing process
- Used Visual SourceSafe for version control in Team Development
- Deployment and setup of the application in UAT environment.
- Collect and analyze requirements and convert them into User Requirement Specification Document.
- Design and development of the data access, business layer and front-end screens.
- Writing technical specification documents.
- Writing scripts for client side form validation using JavaScript.
- Deployment and setup of the application in UAT environment.

HealthCare Client
Systems Engineer
- Development Environment: ASP.NET, VB.Net, ADO.NET, Crystal Report, SQL Server2000, Windows XP
- Design and development of the data model and workflow process.
- Design and development of applications and tools in workflow.
- Deployment and setup of the workflow in vendor sites.
- Designed and developed and extensive module for downloading/uploading the claims from the customer FTP server to Sherpa FTP server using multithread concept in VB.Net
- Designed and developed XML Web Service for Health Care Claims processing.
- Developed an application to automate the Lookup database for US Zip code, provider and member databases.
- Developed an application to generate manifest details by communicating to Customer FTP Server using XML Web Service.
- Developed an application to convert the Keyed data [General Text Format] to customer required format [NSF – National Standrad Format, ANSI 837]
- Used ADO.Net to store and retrieve data from SQL Server
- Developed Windows GUI using VB.NET.
- Developed Reports for Claims tracking using Crystal Report.
- Debug software and fix defects uncovered during the testing process
- Used Visual SourceSafe for version control in Team Development

Software Client
Associate System Engineer
- Development Environment: ASP, XML, JavaScript, SQL Server Windows 2000.
- Collect and analyze requirements and convert them into User Requirement Specification Document.
- Database design and writing stored procedures and functions.
- Design and development of the portal and front-end screens.
- Develop order tracking module by implementing payment gateway.
- Developed metrics report for call center, vendor and program administrator.
- Involved in develop of vendor and product maintenances module.
- Involved in Testing and Defect fixing
- Design and development of the portal and front-end screens.
- Database design and writing stored procedures and functions.

- Writing technical specification documents.
- Customization and support.

Crystal Reports Education / Certifications

- Bachelor of Engineering in Computer Science
- Diploma in Electronics & Communication Engineering
