Crystal Reports Clients / Experience

Healthcare Client,
Software Engineer

Developed and maintained Windows XP software used in the OR. This project was created using Delphi 7, Crystal Reports and using Oracle, SQL Sever and Informix. This system is used to track Clinical documentation in an electronic version instead of paper. Developed and maintained multiple Interfaces that transfers data to and from system wide databases. Provided 2nd tier technical customer support.

Business Consulting Client
Project Manager/Team Lead/Software Engineer

Developed Windows NT software for DoDMERB (Department of Defense Medical Examination Review Board). This project was created using Delphi 4/5/7, Visual Basic, Crystal Reports and Oracle. This system is used to track student's medical information while they are applying for any of the service academies. Developed Windows NT software for AIC (Agency Insurance Company). This project was created using Delphi 4/5 to allow clients to communicate to a server through TCP/IP. Provided technical support for both the DODMERB organization and the medical agencies.

Fraud Prevention Client
Systems Engineer/Systems Analyst/Webmaster

Developed Windows (3.1/95/98/NT) software for fraud prevention systems and services. The RiskTracker™ and RiskFinder™ software were created using Delphi 1, 2 and 3, Crystal Reports, QuickReports and Borland Interbase. These systems are marketed to banks to help detect when fraud can occur. Provided 24-hour technical support for our products.

Research Institute Client

Software Engineer

Developed Dos and Windows (3.1, 95) for a DOD contractor. RBECS (Revised Battlefield Electronic Communications-Electronics Operation instructions Systems) and RACS (Rapid Area Coordination System) were applications to project and analyze frequencies for radios and satellites. The software was created using ADA, Delphi 1 and 2, and QuickReports. Conferred with sponsor and independent testers. Performed demo for users.
