Hyperion Clients / Experience

Construction Corporation Client Hyperion Intelligence Sr. Developer

Description

The Clients Corporation is the 2nd largest homebuilding company in the U.S. It has Land sites and homesites in most of the major cities in United States. Involved in the designing and implementation of the Dashboard using Hyperion Intelligence. This was a very complex Dashboard because we integrated four different sections into a single Dashboard. There was extensive use of Java Scripting in order to make the four sections work correctly in the Dashboard.

Responsibilities

- Created the Datamodel according to the user specifications and generated reports.
- Designed Dashboard using Pivots and Charts.
- Designed a tree like Drill down section in the Dashboard using Pivot tables.
- Used Java Scripting for designing the Dashboard.
- Published Reports in PDF and CSV format.
- Enhanced Performance in existing Dashboards.
- Created Reports for different users according to their requirements.
- Created and Modified views in SQL.
- Implemented Charts in the Dashboard and made them change dynamically.
- Created Users and assigned security level for each User.
- Published reports in Hyperion Performance Suite.
- Worked with Testing team and solved the bugs in the Dashboard.

Environment: Brio/Hyperion Intelligence Designer 8.3, Hyperion Reports 7.2, Hyperion Performance Suite, SQL Server, Oracle 9i, Toad 8.3, Windows XP.

Automotive Electronics Client Hyperion Intelligence Developer

Description

The Client handles all Bureau of Automotive Repairs (BAR) projects. Involved in the designing of reports and Dashboards using Hyperion Intelligence. All the reports have drill down functionalities i.e. selection by summary level or selection by detail level. Many of the reports have Dashboards

Cendien Consulting

<http://www.cendien.com>

for user-friendly purpose. BAR has different type of tests. User can select that test and select the month and year and with just a click they can see that data in the dashboard. All the reports were published into The Clients intranet Server.

Responsibilities:

- Created reports using the views provided by the ETL team.
- Created Users and assigned roles to those particular Users.
- Developed reports in Pivots, Charts and Reports.
- Applied Drill down functionalities in the Dashboards.
- Published reports in PDF and CSV format.
- Used Java Scripting for customizing reports.
- Created reports based on Weekly, Monthly and Yearly basis.
- Implemented Spotlight feature in the report sections.
- Implemented row level security on reports.
- Published reports in Hyperion Performance Suite.
- Worked with QA team for handling bugs in Production.

Environment: Brio/Hyperion Intelligence Designer 8.3, Hyperion Reports 7.2, Hyperion Performance Suite, Oracle 9i, Toad 8.3, Windows XP.

Financial Institution Client, Hyperion Intelligence Sr Developer

Description

The Client is one of the world's leading banking sector and having branches all over the world. The Client's Finance business partners currently access related data through a variety of delivery mechanisms, including Excel spreadsheets, web-based Actuate reports, Powersoft reports, Discoverer reports run against data on the Corporate Treasury Data Mart, and even PDF files. This project is to provide reports based on their businesses, their corporations, projects and lines of businesses to the managerial and decision-makers to help them to analyze the business trends, company P/L's and other budget analyses. Project includes building of several cubes; put them for automation and to design reports in Hyperion Reports, Analyzer, and Planning and also with Excel Add-In. These projects deal Mainly for The Clients associates.

1st Project: FTP (Funds Transfer Pricing)

The objective of the Vision Generation II Funds Transfer Pricing (FTP) Website project is to make the website data more readily accessible to finance users for inclusion in management reporting.

2nd Project: Hoshin-Kanri

The objective of this project is to develop/enhance an integrated tool set that supports the Hoshin Plan build and Kanri reporting processes in place throughout the enterprise

Responsibilities

- Created custom defined reports by complex procedures for accessing, manipulating and reporting enterprise data.
- Used procedures to generate complex reports.

Cendien Consulting

14875 Landmark Blvd., Ste. 100 Dallas, TX 75254

- Created many Web Reports and wrote queries, analyzing data, producing reports using Hyperion Designer and translating functional requirements into technical specifications.
- Worked on Hyperion Intelligence Performance Builder for merging two separate Hyperion bqry files.
- Published Reports in Hyperion Foundation to get access to the Business users.
- Implemented Row level security on Reports.
- Developed reports in Pivots, Charts, Reports.
- Built Dashboards for user interface to filter data and get access to the various sections like Pivots, Report Section, Charts.
- Built login screens using java script to get access to the data based on user privileges.
- Used Views and Stored procedure on that view to create a complex Dashboard.
- Used HTML procedures and Stored Procedures to generate complex reports.
- Optimized Dashboard by writing java script functions wherever required.
- Implemented Spotlight feature in Report Sections.
- Worked in Brio Foundation to Publish reports on Web.
- Worked with QA team for Bugs handling on UAT and Production.
- Created Users, Groups and assigned security level for each User and Group.

Environment: Brio/Hyperion Intelligence Designer 8.3, Hyperion Essbase 7.1.3, Hyperion Reports 8.3, Hyperion Foundation, Hyperion Performance Suite, MS Excel 2000, Toad 8.3, Excel Add-In, MS Project, Oracle 9i, SQL Server 8.0, Windows XP

Communications Client

Hyperion Essbase Developer/Admin

Description

Involved in Planning, Analysis, Designing, implementing and maintaining of Brio. This project is to design and develop Brio Enterprise reporting system and dashboard for Revenue Assurance. As a Brio developer, I created full client reports using Brio Intelligence, Created Brio queries to retrieve data for reports from SQL Server. Most of the reports have drill down functionality i.e. from Top to bottom (Summary level to Transaction level) eg: Telephony Revenue summary for Fiscal/Calendar month. Some of the reports have integrated into dashboard for user-friendly purpose. Comcast has different markets and bill cycles. The user can select market name and bill cycle. The result will be shown in dashboard accordingly. Some report scheduled weekly, nightly and monthly using broadcast server. All reports will be published to Team Comcast intranet website through job manager module.

Responsibilities

- Revenue assurance data mart contains ten dimensions tables and two-fact table one is revenue summary fact and revenue detail fact table.
- Performed Data Validations against Original Numbers Vs Brio Numbers.
- Built a Chart for multiple values as percentages with a group, with each group adding up to 100%.
- Created a Pivot to show the month-to-month Revenue Changes and Year to total.
- Created Charts for Current Month Revenue and Last 3 Months Revenue.

- Drill down functionality applied for all reports i.e. from Top to bottom level and bottom to Top Level.
- Delivered business reports to end-users using Brio Report (Web-based reporting tools)
- Involved in setting up Brio repository in Oracle 8i.
- Created user groups and users in Brio Administration module to maintain the repository.
- Developed all interfaces for Brio reports on EIS (Executive Information System)
- Extensive use of Java Script for customizing reports.
- Scheduled reports on calendar times like weekly, monthly etc and also Event basis through Job Manager module.
- Created Brio training documentation and conducted training session for end users to get familiar with Brio designer and Insight.

Technology Used: Hyperion Essbase 6.2/6.5, Brio/Hyperion Designer 6.6 / 8.2.1, Brio/Hyperion Insight / Dynamic Viewer / Analyzer, Hyperion Performance suite 8.2.1 / Brio On Demand Server / Broadcast Server, Oracle 9i, DB2, JavaScript, SQL, Windows 2000.

Computer Corporation Client, Brio Report Developer

Description

The main objective of the project is to build Data Warehouse and generate reports. I was involved in building Data Warehouse by extracting data from multiple sources like Oracle, SQL Server and Flat files into Oracle. Responsible for Brio Portal Administration and creating reports.

Responsibilities

- Extracted data from multiple sources like Oracle, SQL Server and Flat files into Oracle.
- Created mappings using various transformations.
- Installed and configured OnDemand Server and Broadcast Server.
- Installation and configuration of Brio Portal.
- Build new BRIO queries, user interfaces, and reports.
- Create custom reports using query results.
- BRIO Reports development utilizing SQR.
- Export data as Pivot tables, Excel files, and CSV files, HTML files.
- Utilizing JavaScript created EIS document sections to allow for dynamic report generation.
- Administer and Publish documents to the OnDemand Server to allow for use via Brio Portal, Intranet.
- Schedule and administer Brio reports to run on the Broadcast Server.
- Create OCE's and DSN's to establish database connections.

Technology Used: Brio Designer 6.6, Brio OnDemand Server, Brio Broadcast Server, Oracle, SQL Server, IIS, HTML, DHTML, JavaScript and Windows NT.
