Application Manager (Outline Editor, Report Editor, Calc Script Editor, and Data Prep Editor), and OLAP Server, ASO/BSO.

Databases: ESSBASE, MS SQL 2000, 2003 & 2005, MS Access, Oracle 8i/9i.

Programming Languages: Well-versed in C/C++, VBScript, SQL, Java, and Pascal.

Software Applications: Proficient in Cognos V.7, PeopleSoft EPM, MS Word, Excel, Power Point, MS Visio, MS Project, Web Plan.

Operating Systems: Outstanding knowledge and management of Windows (9x, 2K, NT, XP), and Windows Server 2003.

Hyperion Clients / Experience

Light Source Producer Client

Hyperion System 9 Administrator

The client is the world's leading supplier of excimer light sources, delivers the deep ultraviolet (DUV) photolithography sources that are essential to today's semiconductor marketplace. The client turned to Hyperion solutions to integrate with spare parts forecast model.

Responsibilities:

- Installed Hyperion License Server 9.2.0.3, Hyperion Shared Services 9.2.0.3, Analytic Services 9.2.0.3, Analytic Administration Services 9.2.0.3, Planning 9.2.0.3, Financial Reporting 9.2.0.3, Web Analysis 9.2.0.3, Interactive Reporting 9.2.0.3, Smart View Provider 9.2.0.3, and Hyperion Application Link 7.0.
- Prepared all the installation documentation on the above installed components.
- Provided technical knowledge transfer regarding the installation to the IT support staff.
- Created application and dimensions for cubes as per user requirements.
- Migrated Hyperion Planning applications, for the very first from development server environment to production server environment.
- Analyzed the best practice on Hyperion Backup procedure and recommended the list of things missing for better backup procedure during regular server maintenance.
- Created test cases and demo and verified the backup procedure for approval.
- Prepared the Documentations on Backup of Analytic Services data, Shared services security mode, Planning, Reporting and analysis.
- Created Maxl Scripts which were used to automate the database import from the SQL server.
- Troubleshoot all Hyperion related issues in client and server environment.

Environment: Hyperion System 9.2.0.3 (Analytic Services, AAS, Financial Reporting, Web Analysis, Smart View Provider), Hyperion Planning 9.2.0.3, Hyperion Application Link 7.0, MS Windows Server 2003, MS SQL Server 2005.

Financial Institution Client

The client is one of the largest independent banks in America. It offers complete banking and related financial services to both individual and business customers. The client incorporated Hyperion System 9 to integrate and deliver information from wide range of systems to look consistent and for better decision making.

Responsibilities:

- Implemented Hyperion solutions through Hyperion System 9 (Essbase, Reports, Analyzer, Smart View, and Analytic Services).
- Upgraded previous version of Hyperion BI+ to Hyperion BI+ 9.3 by creating necessary backup of installation, Hyperion home and Repository directories.
- Extensively used Hyperion Reports to produce financial reports that are tailored towards the view of Financial Managers and Analysts.
- Closely worked with Financial Analysts to produce Cash Management Reports and Marginal Statements.
- Performed comparative analysis of ad-hoc reports and standard reports through Hyperion Smart View, Reports, and Analyzer.
- Created and modified Dynamic Dimensions and optimal Data Loading.
- Executed Calculation Scripts and maintained Essbase optimization tuning.
- Administered user groups and privileges in Essbase.
- Developed and maintained automation for all data flowing into and out of the Hyperion Essbase cube architecture using ESSCMD.
- Installed and set up the server with Hyperion Essbase, Hyperion Analyzer, and Hyperion Application Link.
- Performed troubleshooting, diagnoses, and solve all Hyperion Essbase related issues.
- Assisted end-users through direct communication and documentation.

Environment: Hyperion System 9.3 (Essbase, Reports, Analyzer, Smart View, and Analytic Services), Windows XP, OLAP Server, and ESSCMD

Hotel Resort Chain Client

Hyperion Administrator/Developer

The client is one of the world's top operators of full-service luxury hotels and resorts. The client integrated enterprise solutions across Hyperion Essbase Hyperion Planning and Hyperion Financial Management for global consolidation of its business units, reducing month end closing time, and cutting the forecasting process.

Responsibilities:

- Worked in-depth with Hyperion Essbase 7.
- Involved in design, implementation and maintenance of Hyperion Essbase database systems and documentation of processes.
- Involved in the installation of Essbase family products.
- Extensively worked with Hyperion Planning for forecasting and resource management through the use of web forms.
- Used Essbase Administration activities such as filter creation, creation of users, and creation of groups and maintenance of Essbase Servers.

- Used Hyperion Financial Management via Hyperion Application Link to automate reporting process and improved productivity by concurrent database access.
- Extensively used Hyperion Reports to generate centralized reporting generation and access system, for fast deployment and maintenance.
- Creations of dimensions for cubes as per user requirements.
- Automation of data load processes through batch files using MaxL and ESSCMD and rule files to upload data from the databases of different business units to Essbase cube.
- Development and optimization of calculation scripts/business rules and report scripts.
- Calculated optimization in using Cache and Memory Management.
- Analyzed Essbase optimization on the outline and data blocks.
- Actively participated in team and client meetings to synchronize the Hyperion project advancement.

Environment: Hyperion Essbase 7, Hyperion Planning 3.x, Hyperion Reports 7, Hyperion Financial Management, Hyperion Application Link, Essbase Excel-Add-in, Query Designer, Windows 2000/NT 4.0, OLAP Server, ESSCMD and MaxL.

Financial Institution Client

Hyperion Essbase Administrator

The client has been providing quality financial products and services to its customers for 145 years. Due to rapid expansion and inconsistent forecasting, the client turned to Hyperion for the technology infrastructure required to support its financial planning and forecasting processes.

Responsibilities:

- Created and maintained Essbase databases using Planning application to meet financial reporting and consolidation requirements
- Developed application using Hyperion Financial Management (HFM) Suite for automation and reporting process and improving productivity by simplifying the process of accessing multiple data sources and tools at the same time.
- Worked with a team to provide Hyperion Essbase, Hyperion Planning solutions and support.
- Involved in complete life cycle development for Essbase cubes.
- Created rules file for dynamic dimension builds and data loads.
- Performed tuning of data load performance and calculation script times.
- Design and development of calculation scripts which were run using ESSCMD.
- Developed the Load Rules to automatically validate the data and feed it into the new structure.
- Created business rules/calculation scripts for @XREF to pull data.
- Created batch files to run calc-scripts, data load and data calculations.
- Used the Essbase Query Designer by generating queries to display certain data records on the spreadsheet for upper management.
- Created users and groups for access rights in applying security and authorization regulations.

Environment: Hyperion Essbase 6.x, ESSCMD, Hyperion Planning, Hyperion Enterprise, Hyperion Financial Management, Essbase Excel Add-In, Windows 2000.
