- Designed technical documents using a functional specifications as a base document.
- Analyzed the data source to support Essbase cube (built) loading on daily basis.
- Participated and provide input to the source system and ETL team in designing data extraction and transformation software components required to build Essbase input files
- Designed and developed the Essbase Cubes outline using technical design doc.
- Developed the Load Rules file to be implemented on the actual load data.
- Provided business intelligence information by integrating querying, reporting, OLAP, data mining; trouble-shooting information systems
- Developed the Excel templates to lock and send the budget data for business users.
- Developed the calculation scripts for different scenarios.
- Optimized the Essbase Application to balance calculation and retrieval performance.
- Implemented the security using filters.
- Designed and Developed the Analytical reports using Hyperion Analyzer.
- Automated the build and calc scripts using MaxL.
- Scheduled the jobs using windows batch scheduler.
- Production support for standard support environment handling production incidents that occur with nightly processing
- Coordinate with technical support and Hyperion support for trouble tickets fixing
- Supporting existing users and change requests

Environment

Hyperion Essbase Server 7.1.2., Essbase Administration Server 7.1.2., Essbase Administration Console 7.1.2., Hyperion Analyzer 7.x, Hyperion Excel Add-in 7.1.2., SQL Server 2005, Oracle 9i and windows 2000, UNIX

Financial Institution Client **Data Warehouse Developer**

The client is a leading global financial services firm with assets of \$1.3 trillion and operations in more than 50 countries. The client is a leader in investment banking, financial services for consumers, small business and commercial banking, financial transaction processing, asset and wealth management, and private equity. Reports on six lines of business: Investment Bank, Retail Financial Services, Card Services, Commercial Banking, Treasury & Securities Services and Asset & Wealth Management. The project Named Finance One includes collection of all financial data balance sheet data from various units and showing them in reports using Hyperion report tools.

Responsibilities:

- Involved in Designing and development of Company Cubes for the each insurance company and the Body Shop Agencies.
- Designed and developed the outlines for the applications based on the functional requirement documents
- Developed web reports using Hyperion Analyzer for all the insurance companies and the Body Shop Agencies.
- Developed the formatted and monthly standard reports in Hyperion Reports.

Cendien Consulting
