Senior Hyperion Developer – Cendien – Hyperion Experts

Hyperion Professional Services

- Over Six + years of detail-oriented, skilled professional experience in Relational Databases, Data warehousing (Hyperion/OLAP), Client-Server applications, Oracle and SQL Server Database Administration.
- Over four years of functional experience in design, analysis, development, and implementation of various applications using Hyperion Intelligence, Hyperion Essbase, Essbase Integration Services, Hyperion Planning, Hyperion Reports and Hyperion Analyzer under Windows XP/Windows 2003/2000/NT4.0 and Unix environments.
- Expertise in the functionality of various modules of Hyperion Intelligence / Brio.
- Developed various Dashboards and wrote Java-scripts to fulfill various reporting requirements.
- Involved extensively in generating monthly/quarterly financial reports (Balance sheet statement, cash flow statement) using Hyperion Intelligence, Hyperion Analyzer, Hyperion Reports, Hyperion SQR and Hyperion Essbase Spreadsheet Add-in.
- Thorough knowledge of the SDLC and also the entire life cycle of Data warehouse design, development and implementation.
- Experience in providing production support, maintenance, development, and administration of Essbase cubes. Involved extensively in developing dashboards, Java scripts, load rules, calc scripts, automation scripts, and partitioning.
- Proficient in writing Stored Procedures and Triggers using SQL and PL/SQL on Oracle/SQL Server databases.
- Strong communication, organizational and interpersonal competencies along with detail-oriented and problem solving skills in the technology arena.

Hyperion Technical Skills

OLAP Tools: Hyperion System 9 BI (Analytic Administration Services), Hyperion Essbase

6.2/6.5/7.1.2, EAS 7.0, EIS 6.5/7.0, Hyperion Planning 3.3, MS Excel spreadsheet add-in

Business Intelligence Tools: Hyperion Intelligence 8.3, Hyperion Reports 7.2, Hyperion Analyzer

7.0, Hyperion Performance Suite 8.x

Reporting Tools: Hyperion System 9 BI (Interactive Reporting Studio), Hyperion Intelligence 8.3,

Hyperion Analyzer 7.0, Hyperion Reports 7.0, Hyperion SQR 8.3

Operating Systems: Microsoft Windows 95/98/NT/2000/XP, DOS, Unix, Linux

Databases: Oracle 7.0, 8.0, 9i, SQL Server 2000, EssBase, Informix, Teradata, Sybase, DB2

Client Applications: MS Word, Excel, Outlook, PowerPoint, Project, Visio, Adobe Photoshop,

FrontPage.

Languages: C, C++, C#, Java, JavaScript, Visual Basic, XML, HTML, SQL, PL/SQL, SQL*Plus

3.3/8.0, UNIX Shell Scripting.

Hardware Platform: Pentium series, Sun Blade 1000, Unipower 30

Hyperion Clients / Experience

Electronics Client, Hyperion Intelligence (BRIO) Developer/Analyst

Project Summary: The Client is the world's first electronic switch connecting travel providers and distributors. The Client opened up a new world of opportunity for the travel industry. As part of these projects, I had to analyze the existing data models, provide alternative solutions, develop HLD's/LLD's and test plans and set up development environment and test environment. These projects involved development of reports in Hyperion Intelligence and Hyperion Reports and coordinate near shore-off shore activities.

Roles & Responsibilities:

- Performed Data Validations against Original Numbers Vs Brio Numbers.
- Created reports like ICOMS Usage reports, Adjustment reports, One-Time charge reports, Pro-Rate Reports, and Taxes & surcharges reports.
- Built a Chart for multiple values as percentages with a group, with each group adding up to 100%.
- Created a Pivot to show the month-to-month Revenue Changes and Year to total.
- Created Charts for Current Month Revenue and Last 3 Months Revenue.
- Drill down functionality applied for all reports i.e. from Top to bottom level and bottom to Top Level.
- Delivered business reports to end-users using Brio. Report (Web-based reporting tools)
- Involved in setting up Brio repository in Informix.
- Created user groups and users in Brio Administration module to maintain the repository.
- Developed all interfaces for Brio reports on EIS(Executive Information System)
- Extensive use of Java Script for customizing reports.
- Scheduled reports on calendar times like weekly, monthly etc and also Event basis thro Job Manager Module.
- Created Brio training documentation and conducted training session for end users to get familiar the Brio designer and Insight.
- Resolved troubleshoot issues with published jobs.
- Work with other departments to develop and deliver report solutions to internal & external clients
- Meet with BA and other project participants.
- Produce and update report templates.
- Provide support for normal DSS Monthly reporting tasks
- Perform ad-hoc and scheduled training sessions as needed to support DSS tools and reports
- Revenue assurance data mart contains ten dimensions tables and two fact table one is revenue summary fact and revenue detail fact table.

Environment: Hyperion Intelligence 8.3, Informix, Excel Add-In, MS Project, Teradata, Unix.

Financial Client, Hyperion Intelligence (BRIO) Developer/Analyst

Project Summary: The Client is one of the world's leading financial services companies growing rapidly with new acquisitions, providing financial services to individuals, small businesses and corporate clients. At The Client, I worked on projects Hoshin Kanri, Funds Transfer and Pricing (FTP) and Customer Level Profitability Reporting (CLPR).

Roles & Responsibilities:

- Installed and configured Hyperion System 9 BI Analytic Administration Services and Interactive Reporting.
- Installed and configured Hyperion Intelligence Designer, Hyperion Intelligence Architect, Hyperion Reports and Essbase run time clients on Windows XP.
- Was responsible for the development of Reports and Dashboards using Hyperion Intelligence and Hyperion Reports.
- Migrated OTL files, scripts, reports and dashboards to System 9.
- Designed and developed various types of reports (Pivot, Tabular, and Chart and OLAP Query reports) to be used by various user groups using Hyperion Intelligence.
- Analyze the requirements and data model and come up with a working model and provide alternative solutions.
- Develop HLDs/LLDs, test plans and user manuals and also impart training to business users.
- Set up the development and test environments.
- Grant access privileges to users and user-groups as part of security needs.
- Develop Dashboards providing extensive functionality.
- Develop Java scripts to provide functionality to various dashboard objects and also modify local result sets.
- Worked on Report layouts and Report formatting.
- Worked on stored procedures and local result sets to retrieve the required data efficiently.
- Build queries to transform user requests to result sets.
- Develop and test reports in Hyperion Reports pulling the data from Hyperion Essbase.
- Perform administrative tasks on the repository.
- Was the onsite lead and had to co-ordinate near-shore and off-shore activities.

Environment: Hyperion Intelligence 8.3, Hyperion Reports 7.2.1, Hyperion Essbase 7.1, Excel Add-In, MS Project, SQL server, Teradata, Windows XP.

Financial Client Hyperion Intelligence (BRIO) Developer/Analyst

Project Summary: This project was carried out as part of the Hyperion development and maintenance at The Client. The project involved development of reports highlighting the financial results of various businesses at the bank. These financial reports give a snapshot of the various businesses enabling the managers and decision makers to analyze the business trends. Hyperion

Performance Suite was used to develop the reports. Extensive Dashboards were built providing easy access to the managers and executives to various reports.

Roles & Responsibilities:

- Installed and configured various components of Hyperion Performance Suite on windows server and was responsible for the development of reports and dashboards using Hyperion Intelligence.
- Hands-on experience on the various facets of the Hyperion Performance Suite.
- Created an OCE connection to connect to the Oracle database.
- Publish reports to the Foundation and give access privileges to various user groups.
- Apply various Filters for efficient and accurate retrieval of required data.
- Integrated SQR with front-end user interface tools and spreadsheets and tuned programs for optimum performance.
- Analyzed financial results and prepared trend reports to support business managers make profitable decisions using Hyperion SQR Developer and Hyperion SQR Viewer.
- Using functionality of Hyperion Intelligence and SQR, created a personalized dashboard, developed personalized report query and performed analysis.
- Designed and developed various types of reports (Pivot, Tabular, Chart and OLAP Query reports) to be used by various user groups using Hyperion Intelligence.
- Performed migration of reports from previous versions to the current version of Hyperion Intelligence.
- Created and managed BQY job schedule, created and managed time events using Hyperion Performance Suite.
- Prepared quarterly forecasts, annual budget, ad-hoc reporting and management reports in Hyperion SQR and Hyperion Intelligence by working with the business managers.
- Used Hyperion Analyzer to develop reports to outlines the quarterly region wise financial results.
- Used Hyperion Intelligence Clients to facilitate intelligent querying of multiple databases and analytical reporting across the extended enterprise, quickly and intuitively.

Environment: Hyperion Essbase 7.1/6.5, Hyperion Intelligence 8.0, Brio SQR, Hyperion Performance Suite 8.x, Hyperion Analyzer 7.0, Excel Add-In, MS Project, Oracle, Windows 2003/2000

Healthcare Client

Hyperion Intelligence (BRIO) /Essbase Developer

Project Summary: The Client is one of the Nation's leading providers in the musculoskeletal outpatient rehabilitation industry, with over 350 points of service in 19 states. The Client has service lines which include outpatient therapy, orthotics and prosthetics, and industrial rehabilitation. The project involved building a cube, putting the processes for automation and designing and generating reports and dashboards for helping the management with the financial reports and decision making.

Roles & Responsibilities:

<http://www.cendien.com>

- Was involved in the installation, configuration, and administration of the Hyperion/Brio Performance Suite product packages such as Designer, Explorer, Insight Server, Intelligence iServer, Reports iServer, Brio SQR.
- Did reporting, charting and spotlighting using Dashboards.
- Developed SQR code to create tabular, non-tabular, master/detail system independent portable reports along with graphs and charts to present data in visual terms.
- Models were used to analyze many business issues and to integrate the strategic planning processes. Developed user friendly reports and graphs self contained in financial models.
- Extensively worked with Hyperion Reports and Hyperion Analyzer to generate financial reports from different Multi-Dimension Databases.
- Extensively involved in the financial planning model calculations i.e. (Profit, Forecast, Marginal Profit, Elimination, Consolidation, and Headcount) using Hyperion Planning / Hyperion Business Rules.
- Prepared Profitability Reports, which detail Unit Cost, Price and Volume Trends and Expense Variances over prior periods using Hyperion SQR Developer.
- Optimized the applications to bring down calc runtime and database size considerably.
- Designed and implemented batch scripts for loading data from the financial system's database to Essbase cube through data files and rule files.
- Designed users input capability to the applications maintained by Filters.

Environment: Hyperion Intelligence 8.1, Essbase 6.5, Hyperion Planning 3.3 Hyperion Application Link, Hyperion Essbase Integration Services 6.5, Hyperion SQR 8.3, Hyperion Analyzer 6.5, Essbase Spreadsheet Add-in, SQL Scripting, MS Access, MS-SQL Server, Windows 2000/NT

Financial Client

Hyperion Intelligence (BRIO) /Essbase Developer

The Client has a range of solutions to help you integrate data from different sources, automate credit decisions and analyze the risks in your portfolio. Risk Management Solutions; helps customers manage credit exposure and cash. Sales & Marketing Solutions; helps customers find profitable clients and grow. Supply Management Solutions; help customers manage suppliers effectively and save. E-Business; help customers convert prospects to clients faster. Existing Essbase application Market Bridge Demo was build by a third party, which had no support.

Roles & Responsibilities:

- Involved in the installation of Hyperion Performance Suite products.
- Used BRIO SQR extensively for creating custom designed reports for accessing, manipulating and reporting enterprise data from relational databases.
- Using combined functionality of Hyperion/BRIO Intelligence and SQR, created a personalized dashboard.
- Developed users and groups in Hyperion Analyzer and assigned users to different groups.
- Involved in system installation, configuration, and software upgrades from Essbase version 6.0 to 6.5.
- Involved in defining requirements, functional specifications, designing documentations and testing strategies.

<http://www.cendien.com>

- Created Essbase outlines formulas and Calc Scripts using advanced Calc Script functions.
- Extracted the Source Systems Data from the distributed environment, transformed and loaded into the data warehouse database and then populated into Essbase Cube.
- Provided 24/7 Essbase technical support to all business units, offered suggestions and proposed solutions to resolve issues.
- Developed Excel Templates for user interface in Essbase database.

Environment: Brio Intelligence 6, Hyperion Essbase 6.5.4.2/6.0, Hyperion Analyzer, Essbase Excel-Add-in, MS Access, Oracle 8.x, Windows 2000/NT 4.0, DB2.

HealthCare Client Hyperion Essbase Developer

Project Summary: The Client is a group of companies, which include United Health Care, Ovations Uniprise, Specialized Care Services, Ingenix and various other business segments. Each of these different segments provides various products and services across the nation. The aim of the project was to provide the top management and end users, a fully functional data warehouse for each of the business segments separately and as per the user requirements. Development of various cubes, developing calc scripts, developing load rules forecast and budgeting for the next 24 months, combining various cubes, SQL performance tuning, optimization of calc time, were few of the performed tasks.

Roles & Responsibilities:

- Installed and set up the server with Hyperion Essbase and Hyperion Reports.
- Improved data loading and database calculation by modifying the Essbase configuration file settings.
- Developed a multi-dimensional database (MDDDB) application using EssBase that stored and maintained company's financial and marketing data and performed the loading and manipulation of data into the database using Load Rules files.
- Create system models, specifications, diagrams, charts, and document system operational procedures to enhance support functions.
- Developed Calc scripts using the Calc script editor for performing calculations.
- Developed and maintained Rule files, Calc Scripts, and Esscmd Scripts.
- Automated Essbase Cubes through Batch Scripts using Esscmd.
- Optimization and performance tuning for Data Loads/Calculations.
- Maintained cubes and took regular backup.
- Provided technical guidance and support to end-users by developing documentations.

Environment: Hyperion Essbase 6.5/6.0, Hyperion Analyzer, Hyperion Reports 2.6, Essbase Spreadsheet Add-in, MS SQL Server 7.0, Windows NT 4.0
