Backup: Arcserv2000

Hyperion Clients / Experience

Motion Picture Client

Software/Hyperion Consultant

Oasis is the one of the custom build planning application to fulfill their financial reporting. This application builds on Excel, Essbase VB API, spread sheet tool kit, Sql server and Essbase.

Advantage:

- Easy to usage.
- From user's perspective, they can see all reports in excel. They don't want to learn any additional software to finish their budgeting process.
- They can open/close planning cycles based on permission level and also they can input data values manually in data grids as like Hyperion planning in Yellow cells.

My role:

- Developed automate data loading process through template.
- Developed new executable to load actual G&L data into Oasis.

Cendien Consulting

14875 Landmark Blvd., Ste. 100 Dallas, TX 75254

<http://www.cendien.com>

- Provided flexibility to assign user to multiple groups. This change took to change database design.
- Developed admin functionality to create calc scripts dynamically through VB interface.
- Developed new templates for digital media group. By using these templates, they can achieve Revenue/cost and actual / forecast variance reporting.
- Maintain existing templates making enhancements and upgrades as requested.
- Maintain and enhance existing administrative functions to empower the User administrators to administer the application.
- Developed new administrative functions to help users help themselves.
- Improved existing templates by enabling or disabling certain Excel functions; creating a very controlled environment; thus minimizing user errors.
- Maintain Group/ user security based on template and also maintain security dynamically.
- Developed new administrative function to update Essbase outline through VB interface like adding/rename/update member, update UDA's etc
- SAP BW puts data in OS by using Open hub service and reads data from the OS via ftp scripts. If there is no data present in OS, I check the BW process which is a part of BW process chain and if the OLAP has the Job run or the fact tables have data or not.
- Validate data quality between sources (Info cube) and target (Essbase cube).

Environment: Hyperion Essbase 7.1.3, Essbase Administration Services 7.1.3, Excel, VB API, spread sheet tool kit ,Visual Basic 6.3, Citrix Sql server 2000 and SAP BW 3.5./BI

Insurance Provider Client

Sr. Hyperion Planning Consultant

- Provided HLE (High Level estimate) to the client based on the user requirements to develop Premium & loss model.
- Prepared initially, according the conceptual design document provided by the customer, the Detailed Design Document of the New Premium Cube that forecasts PI data at the state and segment level.
- Developed new planning application (Metrix) from scratch as per business requirement.
- Involved in Migrating Planning Applications between various environments and also installation of Planning Applications.
- Created & Used HAL routines to update the metadata changes in Planning Application.
- Developed calc scripts to calculate the new premium model as per business specification.
- Accessed PI data, through Transparent Partition, into the already existing Income Statement model in Essbase. Used also Replicated Partition option to resolve calc time issues.

Environment: Hyperion Planning 4.0.1, Hyperion Essbase 7.1.3, Essbase Administration Services 7.1.3, Hyperion Analyzer 7.2.1, Hyperion Reports 7.2, Excel Add-in, AIX 5.2, DB2, Windows XP, Hyperion Smart View 9.0.

Automotive Manufacturing Client

Essbase Administrator
