Senior Hyperion Developer – Cendien – Hyperion Experts

Hyperion Professional Services

- Over Seven years of IT experience with over three (3+) years of experience in data warehousing with major focus on design and development of Hyperion Essbase applications.
- Extensive knowledge of Hyperion Essbase, Essbase Integration Services, Essbase Administration Services, Hyperion Reports, Hyperion Planning, Hyperion Application Link, and Essbase Spreadsheet Add-In.
- Excellent knowledge in data warehouse and data marts, tuning and Optimization, ESSCMD, MaxL, Batch scripts, and complex calc scripts.
- Principal Consultant with substantial hands-on experience in implementing and supporting OLAP and relational systems, with domain knowledge on various Industry Verticals such as Financial, Pharmaceuticals, Insurance, Logistics and Software Development companies.
- Worked on financial reporting systems and Decision Support Systems (DSS) using Hyperion Essbase.
- Experience with the entire Microsoft Office Suite and Visual Basic for Applications (VBA).
- Possess excellent analytical abilities in using technology to create elegant and flexible solutions for complex business problems.

Hyperion Technical Skills

OLAP Tools: **Hyperion Essbase** 7.1/6.x, EIS 7.1/6.x, **Hyperion Planning** 3.3.x, H.A.L, Hyperion Reports, **Hyperion Analyzer**
Databases: Oracle 9i/8.x/7.x, DB2, MS SQL Server 2000/7.0/6.5, MS Access 7.0/97/2000
Modeling: Star-Schema Modeling, Snow-Flake Modeling, Fact and Dimensions Tables, Physical and logical data modeling.
Systems: MS-DOS, UNIX, WINDOWS 98/2000/NT 4.0/XP

Hyperion Clients / Experience

Financial Client, Birmingham, AL
Senior Hyperion Developer/ Administrator

With the merge of two banks, the organization incorporated a new database for the Referral Validation System (RVS), which managed Telebanking Referrals and incentives paid to all the LOB's at the call centers. This project included designing and planning the deployment of architectures of the new Database and development of various reports for the Referral System goals.

As a Developer:
- Preparing and maintaining documentation including technical specifications of the process flows.

- Developed SQL tables, Views, and the Stored Procedures for the data maintenance.
- Involved in the development of the OLAP models, Meta outlines and the Essbase cubes using Integration Services.
- Build cross reference database for the calculation of the incentives paid through different tiers.
- Created Calc Scripts, Member Formulas, Load Rules and as per the requirements from the business analysts.
- Developed Reports for the Business Goal and the Referral System's Validation.
- Analyzed the business objects by validating the data extracted/loaded through the Excel spread-sheet Add-in.

Environment: **Hyperion Essbase** 6.5.1, EIS(Essbase Integration Services) 6.5.1, **Hyperion Reports** 2.0, Microsoft Excel 2000, MS SQL Server 8.0, and Windows 2000 Advanced Server.

Financial Client, Kansas City, MO
Senior Hyperion Developer/ Administrator

Client is the leading tax return preparation company holds major customers in US, Canada, Australia and UK. The company also provides other products and services; these include tax-preparation software, residential mortgage loans and administrative functions. This position serves as a support to the database development, maintenance, providing service options to the customer and coordinating with the plan adjustments and the forecast part of the business depending on the Tax/Off-Tax seasons. Worked as a team member for business analysts in execution and documentation of the daily, monthly and Ad-hoc processes.

As an Administrator:

- Used Hyperion planning for the development of web forms for the data entry in the Essbase cubes.
- Assigned security access to the Users, Groups, dimension members and web forms through Hyperion Planning.
- Involved in analysis, development and enhancement of database outlines. Restructured and redesigned existing Essbase cubes.
- Assigned access to the users to the particular application databases through Essbase.
- Implemented the HAL process for the extraction and loading of data into the databases and for the dimension maintenance processes.
- Updated/ modified the existing Calc Scripts, MaxL scripts, UDA's, Load Rules and Attribute dimensions as per the requirements of the business analysts.
- Monitoring production runs for the daily drivers loading, monthly actuals loading, dimension maintenance and the forecast cycling processes.

As a Developer/ Support Analyst:

- Preparing and maintaining documentation including technical specifications of the process flows.

- Created the training material for the offshore resources and guiding them through the processes being the onsite resource.
- Analyzed the business objects by validating the data extracted/loaded through the Excel spread-sheet Add-in.
- Developing a fundamental understanding of multiple business functions and related production systems.

Environment: **Hyperion Essbase** 7.x, EAS, **Hyperion Planning** 3.5.1, **Hyperion Reports** 7.2, HAL, Microsoft Excel 2000, MS SQL Server 7.0, and Windows 2000 Advanced Server.

Logistics / Transportation Client, Memphis, TN   Oct 2004-Sep 2005
Senior Hyperion Essbase Developer/Analyst

The world's largest express transportation company with a mission to produce superior financial returns with highest quality solutions. The major role of the project was to develop different cubes to integrate Essbase applications for reporting using analyzer. Essbase Integration Services (EIS) were used to load and update the Essbase cubes.

As an Administrator:
- Created Users and Groups in Hyperion Essbase, Hyperion Reports and Hyperion Analyzer and assigned privileges to them. Applied security on different applications by creating Filters on its dimension members.
- Developed automation scripts for back up and Refresh of all Production Cubes during recovery.
- Involved in reviewing the cube design, Performance Monitoring and Performance Tuning of the Essbase server.
- Installation and setting up of the server with Hyperion Essbase, Hyperion Analyzer, HAL, Executive Viewer, and Hyperion Reports.
- Developed EIS Meta-outline for the cube and created various filters as per user requirement.
- Created Transparent Partitioning on databases using MaxL scripts.

As a Developer/Analyst:
- Evaluated Essbase 7.1 and provided recommendations to Management. Developed Aggregate Storage Cubes using Essbase 7.1.
- Created and made changes to the existing MaxL Scripts and scheduled the batch script to automate the running of the new Calc Scripts with development of outlines and load rules.
- Analyzed and loaded data from Excel and also, developed VBA interfaces to load data from excel.
- Designed and developed all the reports using Hyperion Reports 7.2, Hyperion Analyzer 7.2, Hyperion Intelligence 8.3.
- Filtering out information using dashboards to make better decisions on the provided reports.

Hyperion Planning and HFM Usage:
- Used Hyperion Financial Management (HFM) for Financial Analysis and Reporting.

- Installed and upgraded Hyperion Planning Application from Version 3.5 to 4.0.
- Responsible for maintaining users and security in Hyperion Planning and provided technical guidance and support to end-users by developing the documentation required.
- Extensively used Hyperion Planning for upgrading many business rules and developed many web forms.
- Analyzed financial results and prepared trend reports to support business managers make profitable decisions.

Environment: **Hyperion Essbase** 7.x, EAS, **Hyperion Planning** 3.5.1, **Hyperion Reports** 7.2, Hyperion Financial Management, Hyperion Analyzer 7.0, Hyperion Metrics Builder, Hyperion Scorecard, Hyperion Dashboard, Microsoft Excel 2000, MS SQL Server 7.0, Oracle 8i, and Windows 2000 Advanced Server

Pharmaceutical Client, Philadelphia, PA   Jan 2004-Aug 2004
Hyperion Developer/Analyst/Administrator

Research-based pharmaceutical company that discovers, develops, manufacturers and markets leading prescription medicines. This project included designing and planning the deployment of architectures and the migrations to new systems and technologies, taking a leadership role in delivering enterprise integration solutions.

As an Essbase Database Administrator:
- Predefining data mapping from Hyperion Essbase to the relational source, and running ad-hoc queries for providing optimized reports.
- Responsible for providing technical and production support for live applications and also for end users. Developed documentation required for knowledge transfer to users for application administration and support.
- Involved in reviewing the cube design, Performance Monitoring and Performance Tuning of the Essbase server.
- Created Users and Groups in Hyperion Reports and Hyperion Analyzer. Configured Hyperion Reports and Hyperion Analyzer server. And also responsible for maintaining users and security in Hyperion Planning and Hyperion Essbase applications.
- Recovered applications from its back up when database was corrupted.

As an Essbase Developer/Analyst:
- Designed and developed numerous Essbase applications with excellent balance of dense and sparse dimensions, arranged in an hourglass fashion.
- Developed automation scripts for back up and Refresh of all Production Cubes.
- Evaluated Essbase 6.5 and provided recommendations to Management. Developed Aggregate Storage Cubes using Essbase 6.5.
- Involved in gathering requirements and developing project plan & system level requirement definition (SLRD).
- Created and made changes to the existing MaxL Scripts and scheduled the batch script to automate the running of the new Calc Scripts.
- Analyzed and loaded data from Excel and also, developed VBA interfaces to load data from excel.

- Analyzed financial results and prepared trend reports to support business managers make profitable decisions.
- Designed and developed all the reports using Hyperion Reports, Hyperion SQR, Hyperion Enterprise and Hyperion Analyzer.

Environment: **Hyperion Essbase** 6.5, **Hyperion Planning** 3.3, Hyperion Reports 7.0, Hyperion Analyzer 6.2.1, Microsoft Excel 2000, MS SQL Server 7.0, Windows 2000 Advanced Server.

Financial Client, Charlotte, NC   Feb 2003-Jan 2004
Essbase Developer / DBA
This project is to find a solution to model the operational details of existing business lines in greater depth, and also to model what-if scenarios involving new products, services and processes. One of the cubes designed was to find the cost of processing checks. There are so many costs involved in the processing of checks such as ATM cost, debiting cost, crediting cost, cost to accept, cost to reject and some more.

Role & Responsibilities:
- Extensively involved in performing DBA activities like performance tuning the Calculations scripts, database tuning, and backups.
- Involved in the installation of Essbase Administration Services, Essbase Integration Services, Hyperion Analyzer and Hyperion Application Link.
- Migrating Essbase server into newer versions and newer operating systems.
- Provided 24/7 Essbase technical supports to all business units, offered suggestions and proposed solutions to resolve issues.
- Restructured and redesigned previous Essbase cubes.
- Developed many load rules for loading specific type of data files.
- Extensively used MaxL, ESSCMDS to run calculation scripts and report scripts and performance tuning of data load calc scripts.
- Modified and replaced existing financial, marketing and other reports.
- Also responsible for DBA functions such as user creation, security profiles and authorizations.

Environment: **Hyperion Essbase** 6.0, Hyperion Integration Services, Hyperion Administration Services, Hyperion Analyzer, Excel Add-In, MS Project, Oracle, Windows NT/2000, Shell scripts

Oracle Developer
Worked as an Oracle Developer for database conversion, Involved in major database report handling and designed various databases at various levels of several of APEX Clients.

Role & Responsibilities:
- Developed PL/SQL programming that included writing of Stored Procedures, Packages, Functions and Database Triggers.
- Created Temporary Tables to store the data from Legacy system.
- Used SQL *Loader scripts to load the data into temporary tables and PL/SQL procedures to validate the data.
- Creation of Materialized views and function based indexes.

- Setting up various notification scripts which will notify if the database is not up and running or if any directory space is filled up.
- Used Oracle packages for automation, Oracle designer for data modeling.
- Used Visual SourceSafe for version control and performing various builds
