Senior Hyperion Developer – Cendien – Hyperion Experts

Hyperion Professional Services

- Over five (5+) years of professional experience in IT field with over three (3+) year of experience in design, analysis, development and implementation of Hyperion Essbase, Hyperion Analyzer, and Hyperion Reports applications.
- Excellent knowledge and experience of Essbase Calc Scripts and MaxL Scripts.
- Expertise in EssCmds, Dynamic Dimension Build Methods, Dimension Rules, and Data Load Rules.
- Proficient in star and snowflake schema data modeling techniques used to design data warehouse and data mart.
- Strong understanding of dense and sparse strategy dimension allocation, performed dynamic calculations, and also developed report queries.
- Expertise in Microsoft office tools and Visual Basic Applications (VBA).
- Hands on Experience in Oracle9i, SQL Server2000 - 2005, Targit BI Suite, Analysis services, Reporting services, and MS Access.
- Proficiency in Object-oriented software development; skilled at progressing from problem statement to well-documented stages of analysis, design, development, testing and deployment.
- Excellent programming skills in C/C++, JAVA, Visual Basic 6, SQL, PL/SQL, HTML, DHTML.
- Strong program analyzing skills, with ability to follow project standards.
- Strong ability to understand new concepts and applications.
- Proficient in software documentation, technical report writing, flexible in work schedules and also having strong leadership qualities.
- Excellent verbal and written communication skills have proven to be highly effective in interfacing across business and technical groups.

Hyperion Technical Skills

OLAP Tools: Hyperion Essbase 7.1.2/6.5.4/6.3/6.1, Hyperion Analyzer 7.x/6.x, MaxL, ESSCMD.
Targit BI suite

Reporting Tools: Hyperion Application Builder, Hyperion Reports, Hyperion Excel Spreadsheet, Add In Micro Strategy Web, MS SQL 2005 Reporting services, Targit BI Suite.
Analysis / Methodology: Rational Unified Process (RUP), UML, Rational Rose, Use Cases, Rational XDE, Photoshop, Macromedia Flash, Adobe PhotoShop.

Languages: SQL, T-SQL, C/C++, Java, Visual Basic 6.0/5.0

Databases: Essbase, MS SQL Server 2000/2005, MS Access 2000, Oracle 9i,

Operating System: MS-DOS, Windows 2000/NT 4.0/98/95/XP.

CENDIEN CORP: **(214) 245-4580**

<http://www.cendien.com>

Project Management Tools: Microsoft Visio 2000, Rational Clear Case.

Hardware Platform: Windows 2003/2000/NT Servers.

Web Design & Other Tools: HTML, MS FrontPage, Dream Weaver, and Macromedia Flash.

Hyperion Clients / Experience

Pharmaceutical Client

Hyperion Essbase Developer

The client pharmaceutical Company and it has three business segments: health care, animal health and common health. Pharmaceutical sales intelligence factory (PSI factory) is a data warehouse and Business Intelligence system. The applications are deployed across US, Canada to district managers and to senior sales and marketing management at head quarters. PSI factory allows management to analyze key performance indicators (KPI) such as sales, growth, call activity and customer targeting.

Role & Responsibilities:

- Analyzed the functional requirements and converted that into technical design.
- Design and developed the essbase outline data material dynamically.
- Developed the rules files to load the actual data.
- Developed the excel templates for business user community to load the budget data.
- Developed the calculation scripts to aggregate the data for different scenarios.
- Optimized the applications to balance the calculation and retrieval performance.
- Generated the report scripts.
- Developed the reports using Hyperion analyzer.
- Implemented the security using filters.
- Automated the build and calculation using maxl.
- Schedule the jobs using windows batch scheduler.

Environment: Hyperion Essbase 7.12, Hyperion analyzer 7.x, EIS, ESSCMD, Essbase Excel Add-In, MS- Excel, MS- Access, Windows 2000 server, Oracle 9i

Printing Publishing Client

Database Developer/ Consultant

The client is a Magazine Printing/Publishing company and a distribution company. The client requires migration of a robust MS access interface system called Distribution Plan builder to SQL 2005 platform, which is used to build a job for distribution of newspapers/magazines into letterboxes.

Role & Responsibilities:

- Analyzed the functional requirements and converted that into technical design.
- Designed, developed and implemented a MS Access system with a front end built on VB6 with the backend migrated to SQL server 2005

Cendien Consulting

CENDIEN CORP: **(214) 245-4580**

<http://www.cendien.com>

- Looked at various BI tools (Targit, Sap-BW) to see an effective approach.
- Migrated required data to Hyperion data format through SQL server DTS.
- Design and developed Essbase outline as per requirement specifications.
- Developed the rules files to load the actual data.
- Worked on Hyperion Analyser to analyse the information as per requirements.
- Developed the excel templates for business user community to get required data.
- Generated management reports for CEO and higher management.
- Generated the report scripts.
- Designed and developed the reports.
- Automated the build and calculation using calc scripts.
- Schedule the jobs using windows batch scheduler.
- Developed the reports in charts and tabular formats using Essbase Excel Add-In.
- Involved in developing detailed documentation of the system.

Environment: SQL server 2005, MS windows server 2003, Hyperion Essbase 7.12, Hyperion analyzer 7.x, EIS, ESSCMD, Essbase Excel Add-In, MS- Excel, MS- Access

Automotive Producer Client Hyperion Database Consultant

Worked with the Client to specialize in hyperion. This is a hyperion consultant role in a large scale computer network environments which is projects based and also network administration. I was extensively involved in deploying and monitoring the defects in Security system of their databases and reports.

Role & Responsibilities:

- Acted as a liaison between the technology and business areas of the organization. Involved in gathering requirements, functional specifications, designing documentations, testing strategies and developing a project plan
- Interaction with finance and accounting customers who possessed various levels of technical knowledge.
- As an administrator, created users in Essbase Server and assigned different roles to them.
- Created different security classes and assigned them to the different users and dimensions.
- Managed Task Security, task securities determines tasks within an application and authentic valid user to access the data; each user role is associated with the set of tasks.
- Worked on Data Security to protect data and prevent unauthorized access of users from changing data in Hyperion Analyser.
- Assigned member properties like consolidation/ calculations, UDA, and Alias to the different dimension members.
- Created and ran automation scripts using ESSCMD, MAXL, PERL in UNIX (AIX) environments.
- Restructured and redesigned previous Essbase cubes. Maintenance of previous Essbase cubes.
- Exported the data contents using the VBA procedures, which copied cells into a new worksheet.

- Developed Aggregate Storage Cubes (A.S.O) using Essbase 7.1. Optimized applications to bring down runtime and database size considerably. Modified and replaced existing financial, marketing reports.
- Designed and developed numerous Essbase applications with excellent balance of dense and sparse dimensions, arranged in an hourglass fashion.
- Developed star schema for the OLAP model, and created EIS Meta-outline for the Essbase cubes.

Environment: Hyperion Essbase 7.12, Hyperion analyzer 7.x, EIS, ESSCMD, Essbase Excel Add-In, MS- Excel, MS- Access, Windows 2000 server, Oracle 9i

Wireless Network Systems Client Analyst Programmer

Project Scope: The Client is a WIFI company which implements wireless network system company. The Client has developed a RSS live Feed Ticker for its hot spots. This is an XML format application which runs on the desktop and is used as live feed advertisement tool for The Client. It's a ticker application, which runs on your desktop as soon you connect to The Client in one of the hotspots. This system was one of the major projects that I was part in The Client as Analyst Programmer.

Role & Responsibilities:

- Design and developed the database for the RSS live Feed Ticker.
- Used ERD models for modeling designed logical and physical database architecture.
- Used Data Modelers before implementing the data model, giving inputs about the required indexes, constraints, foreign key relationships.
- Worked on SQL Server databases.
- Created Stored Procedures and Database Triggers.
- Designed the interface to ticker using Java.
- Developed Manual Test Scripts for unit testing.
- Performed Integration testing simulating a real time production environment

Environment: , Windows 2000 server, SQL server, Java.

Health Care Institution Client MS- SQL 2000 Database Developer

Project Scope: Created a SQL database for Hospital Management System as part of the course in University. It is a product developed keeping in view of 100 to 500 bed hospitals. It covers all the areas in a Hospital. It has 26 modules like Registration, Admission, OP Billing, IP Billing, Wards, Emergency, Investigations and Inventory etc. This facilitates the registered user to apply for the online appointment with the doctor, can see the investigation reports from anywhere using global UHID (NHI – National health index). It provides the MIS reports to the doctor as well to the management online.

Role & Responsibilities:

Cendien Consulting

<http://www.cendien.com>

- Worked extensively on detailed system analysis, design and development of the system lifecycle.
- Used ERD models for modeling designed logical and physical database architecture.
- Used Data Modelers before implementing the data model, giving inputs about the required indexes, constraints, foreign key relationships.
- Worked on Oracle and SQL Server databases.
- Using Data Transformation Services (DTS) an Extract Transform Loading (ETL) tool of SQL Server to populate data from various data sources, creating packages for different data loading operations for application.
- Worked on PL/SQL for writing Stored Procedures, Packages, Functions and Database Triggers.
- Developed PL/SQL scripts for back end validation/ updates.
- Used ASP and Developer 2000 for designing the client server applications.
- Developed Manual Test Scripts for unit testing.
- Performed Integration testing simulating a real time production environment.

Environment: MS- Access, Windows 2000 server, Oracle 9i, .NET, Rational Rose Suite.

Entertainment Systems Client

E- Commerce website Developer

Environment : ASP.Net, Dream weaver, HTML, Flash, MS Access.

Team Size : 3

Description : As part of the course requirement for Rapid Application development (RAD) we have created an E-commerce website for an entertainment systems company. The Client has an effective feedback system which it uses to sell its products and services. Our main goal of the project is to create a professional feedback system. Web page is created in dream weaver, ASP.net with MS Access database.

Role: Involved in Designing and Development of the Database for products and services and created the feedback page for website in Asp.Net connecting to Access database. Also, wrote a Post-Grad research report on RAD methodology.

Education / Certifications

Post Graduated in Computer Science

Bachelor of Information Science (Double Major: Computer Science and Information Sciences)

Microsoft Certified Professional
