Senior Hyperion Developer – Cendien – Hyperion Experts

Hyperion Professional Services

- Over all 6+ years of IT experience with over 5 years of experience as a Hyperion Essbase developer.
- Extensive experience in design, analysis, development and implementation of various applications in client/server OLAP environment using Hyperion Essbase, Hyperion Analyzer, Hyperion planning and Hyperion reports.
- Strong database development and business intelligence modeling capabilities; Essbase calculation script knowledge.
- Experience in Maintenance and Administration of Hyperion Essbase Cubes, and strong experience in Data Load Rules and expertise in writing ESSCMD and MaxL Commands.
- Experience in Hyperion essbase Security, setting up authentication to Hyperion products and creating users on User directory.
- Hands-on expertise creating reports using Essbase Excel Add-In and Wired for OLAP/Analyzer.
- Strong Understanding of dense and sparse strategy dimension allocation, performed dynamic calculations, developed, reviewed, and optimized report queries.
- Proficient in the star and snowflake schema data modeling technique used to design for data warehouse and data mart.
- Strong experience in all phases of System Development Life Cycle (SDLC) process.
- Proficient in software documentation, technical report writing, decisive with strong leadership qualities, flexible in work schedules.
- Experienced in knowledge transfer, preparing the required documentation, training the clients.
- Ability to meet deadlines and handle pressure in coordinating multiple tasks in a work/project environment. Versatile team player with excellent analytical, presentation and inter-personal skills.

Hyperion Technical Skills

OLAP Development Tools: Hyperion System 9.3, Hyperion Essbase 7.1.2/6.5.x, EAS 7.1.2, EIS 7.0/6.x

Reporting Tools: Hyperion Planning, Hyperion Reports 7x, Hyperion Interactive Reports 9x, Excel-Add-In

Operating Systems: MS-DOS, UNIX, WINDOWS 98/2000/NT 5.0/XP

Databases: Oracle 9i/8i, MS SQL Server 2000, MS Access, Toad 8.0

Hardware Platform: SUN Solaris, Windows 2000/NT Servers

Languages: C, MS Visual C++, PL/SQL, Visual Basic 6.0

Web Design: HTML, MS FrontPage, DreamWeaver, and Macromedia Flash

Dimensional Modeling: Star-Schema Modeling, Snow-Flake Modeling, Fact and Dimensions Tables, Physical and logical data modeling

Hyperion Clients / Experience

Financial Corporation Client

Essbase Developer

The client is a financial corporation operates a residential mortgage company, a leasing company, two insurance companies, an electronic banking and processing Services Company, one full-service broker/dealer business, one small business investment corporation along with 322 full-service banking offices. Project includes creating consolidated financial information on a daily basis for numerous Computer Associates general ledgers and other data sources while minimizing the impact on the IT department.

Responsibilities:

- Maintenance previous Essbase cubes.
- Involved in whole Software life cycle development for Essbase cubes.
- Involved in creating rules file for dynamic dimension builds and data loads.
- Involved in development of new cubes such as ledger cube and Closing ledger cubes.
- Worked on performance tuning of data loads and calculation script times.
- Design and development of calculation scripts.
- Implemented the security using security filters.
- ESSCMD is extensively used to run these calc scripts.
- Developed the Load Rules to automatically validate the data and feed into Essbase new structure.
- Used Hyperion Analyzer to build reports.
- Redesigning and Restructuring of Previous cubes.
- Created batch files to run calc scripts, data load and data calculations.
- Extensively worked with Hyperion Reports and Hyperion Analyzer.

Environment: Hyperion essbase 9, Hyperion essbase 7.1.2/6.5, Hyperion Analyzer, Excel Add-In, MS Project, Oracle 9i, Windows NT, Hyperion Reports

Financial Institution Client

Essbase Developer

The client is leading financial organization in Midwest. To be a leader in the their territory and grow, Executive leadership needs management reporting system to obtain all relevant information to assist

Cendien Consulting

14875 Landmark Blvd., Ste. 100 Dallas, TX 75254

in decision making and to understand the state of the company. This management reporting system will provide common metric definitions across the business to enable appropriate comparisons in a user friendly and streamlined manner.

Responsibilities:

- Analyzed user requirements and involved in the process of designing and finalizing of dimensions for cubes.
- Developed batch files using MaxL and rule files to upload data from systems database to Essbase cube.
- Developed EIS model and outlines.
- Developing Calc and Report scripts.
- Optimization of Data Loads and Calc scripts according to system specifications and capabilities, to reduce runtime.
- Involved in user interaction and resolved issues related to data and security.
- Involved in supporting the Applications during the close process.
- Support existing cubes, problem identification, resolution and documentation.
- Involved in providing 24/7 on call production support.
- Involved in migrating block storage to Aggregation storage applications.
- Migrated the member formulas to MDX queries.
- Involved in documenting technical specifications and automation process.
- Developed copy of the existing Wired OLAP reports in Hyperion Analyzer 7.1.
- Did extensive study of current production process from user and process point of view to find the loophole that was affecting the current performance.
- Obtained 30% process improvement after changing Process flow.

Environment:

Hyperion essbase 9, Hyperion essbase 7.1.2/6.5, EIS, Analyzer 7.1, Excel VBA, MS Excel, MS Access, Windows 2000 server.

Financial Institution Client

Essbase Developer

To keep track of these huge amount of data, Essbase was used to keep track of all the sales that were taking place in various places.

Responsibilities:

- Developed and optimized Data Loads and Calculations.
- Developed calc scripts to calculate various figures for the outline.
- Used Esscmd in an interactive and batch mode to load data files.
- Analyzed all dimensions and members in the Essbase outline for performance tuning.

Cendien Consulting

14875 Landmark Blvd., Ste. 100 Dallas, TX 75254

<http://www.cendien.com>

- Created new OLAP reporting environment for the Center Development group. Modeled 3 cubes in Essbase, covering Sales, Financial Statements, Market Share, and Customer satisfaction metrics.
- Created in depth requirements documentation detailing business requirements, data warehousing architecture, and related design considerations. All documentation was presented to upper management.
- Coded applications to automate the cube update procedures. Authored documentation for the new system.
- Prepared quarterly forecasts, annual budget, ad-hoc reporting and management reporting using Hyperion Reports version 2.0/7x by working with the business managers
- Maintained cubes and took regular backups.
- Oversaw day-to-day operations of the Essbase system. Resolved both system and data issues as they occurred.
- Implemented new reports and processes for users as needed.
- Installed, configured and tested new versions of Essbase, and Reports as needed.

Environment: Hyperion Essbase 6.0, Hyperion Reports 2.0, Hyperion Analyzer, Microstrategy, H.A.L, and Excel Add-in for Essbase

Pharmaceutical Client

Hyperion Essbase Developer

Project: Pharmaceutical sales

The client is a research based global pharmaceutical company. The company has 3 business segments: healthcare, animal health and consumer healthcare. PSI factory is a data warehouse and business intelligence system. The applications are deployed across Canada to district managers and to senior sales and marketing management at headquarters. PSI factory allows management to analyze KPI's (key performance indicator) such as sales, growth, call activity and customer targeting.

Responsibilities:

- Analyzed the business requirements and converted that into technical design.
- Designed and developed the outline. Dynamically build the dimensions.
- Developed the rules files to load the actual data.
- Developed the excel templates for business user community to lock and send the budget data into Essbase cube.
- Developed the calculation scripts to aggregate the cube data for different scenarios.
- Optimized the hyperion application to balance the calculation on retrieval performance.
- Developed the report scripts.
- Implemented the security using security filters.
- Automated the build, load and calc using MAXL.
- Scheduled the entire process using windows batch scheduler.

Environment: Hyperion Essbase 6.0, Hyperion Analyzer, Excel add-in, Oracle 8i and Windows 2000 server.

Government Department Client

Position: Developer /Analyst

Involved in development and implementation of package for district primary education programming for the State Government, this package was developed for keeping track of the information of Government Primary Schools, a crucial project that gives the information regarding the details of staff, student and the schools performance and the infrastructure.

Responsibilities:

- Worked with the end users and gathered information for designing the technical specifications.
- Data analyzing, coding, mapping, and cleaning, conversion and reports generation.
- Conversion of the data from the existing legacy systems to the new module.
- Developed queries using SQL and interfaced them with the reports, excel to develop Reports.
- Interacted with end users for designing the specifications to develop the reports.
- Performed database testing with SQL scripts to verify the data integrity.
- Wrote SQL queries to check proper data population into application tables.
- Participated in fit/gap analysis and system testing and wrote inbound and outbound interface programs.
- Created and maintained tables, procedures, view, triggers.
- Performed database testing with SQL scripts to verify the data integrity.
- Developed front-end screens as per the user requirements by incorporating the code, which does the business rules validation while the user enters the data online.

Environment: Oracle 8.x, Visual Basic 6.0, Reports, Windows 2000.

Education / Certifications

Bachelors in Engineering
