## Senior Hyperion Developer – Cendien – Hyperion Experts

### Hyperion Professional Services

- Possess over six years of experience in Relational Databases, Data warehousing (Hyperion/OLAP), Client-Server applications, Oracle and SQL Server Database Administration.
- Over four years of functional experience in design, analysis, development, and implementation of various applications using Hyperion Intelligence, Hyperion Essbase, Essbase Integration Services, Hyperion Planning, Hyperion Reports and Hyperion Analyzer under Windows XP/Windows 2000/NT4.0 and UNIX environments.
- Have hands on experience in the entire Life Cycle of Data warehouse design and in designing, Writing and Executing Test Plans.
- Expertise in reporting using Hyperion Interactive Reporting (Brio) and Hyperion Performance Suite with Hyperion Intelligence Designer/Explorer.
- Developed numerous cubes from conceptual stage, designed Essbase MDDDB applications, OLAP Models and Meta-Outlines with excellent balance of dense and sparse dimensions.
- Commendable knowledge and experience in automation, Essbase cube designing, partitioning and optimization of report queries.
- Excellent in coding Oracle SQL, PL/SQL, Stored Procedures and Triggers in PL/SQL and administrating databases in Oracle and MS SQL Server.
- Have very good knowledge and experience in Hyperion Application Link (HAL) and Hyperion Financial management (HFM).
- Effective team player, self-motivated, capable of adapting to new technology and possessing strong problem solving and analytical skills, excellent verbal, written and inter-personal communication skills.

### Hyperion Technical Skills

OLAP Tools: Hyperion Essbase 7.x/6.x/5.x (AAS), Excel Add-In, Essbase Integration Services 7.1/6.x

Business Intelligence Tools: Hyperion Planning 9.3, Hyperion BI+ 9.3, Hyperion application link (HAL), Hyperion Financial Management Suite (HFM)

Reporting Tools: Hyperion Analyzer, Hyperion Reports 7.0, Production Reporting (SQR) and Hyperion Intelligence 8.3 (Brio)

Dimensional Modeling: Star-Schema Modeling, Snowflake Modeling, Fact and Dimensions Tables, Physical and logical data modeling.

Internet Technologies: ASP, HTML, MS FrontPage, Dream Weaver, Macromedia Flash, DHTML

RDBMS: Oracle 9i/8i,8.0/7.0, DB2, Teradata, MS SQL Server, MS Access

Operating system: Win 95/98/2000/XP, MS DOS 6.22, LINUX, AIX version 5L Version 5.2

Languages: C, C++, Java, JavaScript, VB script, Visual Basic, XML, MaxL, Esscmd, HTML, SQL, PL/SQL, SQL\*Plus 3.3/8.0, UNIX Shell Scripting.

## Hyperion Clients / Experience

### Oil Corporation Client

#### Hyperion Analyst/Developer

The client is a worldwide oil and natural gas exploration and production company. The project involved in building a cube, putting the processes for automation and designing and generating reports and dashboards for helping the management with the financial reports and decision making.

#### Roles & Responsibilities:

- Extensively involved in installation, configuration, server settings, backups, and client installations of Hyperion products such as BI+, Essbase, Planning, Web Analysis, HAL and Hyperion strategic Finance on Windows environment
- Upgraded and migrated all the applications and databases from older version, Hyperion 9.2 to 9.3.0.1
- Developed and maintained a cube for loading the data and wrote Calc scripts to calculate the data according to the users' needs.
- Developed Calc Scripts, Load Rules and Report scripts to automate the data load process
- Created OLAP Model and Metadata Outline for Essbase OLAP Server and loaded data using Analytic Administration Services (AAS).
- Created users and user groups using Hyperion Shared services and assigned various types of Permissions to User Groups to access the reports.
- Applied various Filters for efficient and accurate retrieval of required data.
- Developed automation scripts for back up and Refresh of all Production Cubes.
- Assured optimal match between cube design and report specifications
- Responsible for developing Brio reports, creating technical specifications, testing and QA of reports and support.
- Maintained over 100 reports and updated the reports to reflect database changes.
- Handled performance tuning, weekly back-ups and monthly consolidations of data and automated monthly/quarterly/annual report generation
- Optimized the applications to bring down calc runtime and database size considerably
- Optimized outline structure, loading and calculations through appropriate dense and sparse settings of dimensions, storage allocations and by dynamic calculations and debugging.

Environment: Hyperion BI+ 9.3, Analytical administration services, Hyperion Web Analysis, Hyperion Strategic Finance, Hyperion Planning, Hyperion Excel Add-in, Hyperion Smart view, Oracle 10g Application server, Windows NT and SQL server 2000.

### Financial and Insurance Client

#### Hyperion Analyst/Developer

---

#### Cendien Consulting

The client is a financial and insurance company. I developed a reporting system, optimized queries and scheduled reports generation for the whole year, monthly, weekly and daily as per the requirement of the users. As an extension of the project, developed/reengineered reports used in conjunction with the clients planning application.

### Roles & Responsibilities:

- Used HFM to improve productivity by accessing multiple data sources at the same time
- Assisted with the integration of financial reporting along with streamlining of process/method improvement for data collection
- Extensively involved on the Hyperion Financial Management (HFM) reporting Infrastructure including System Infrastructure, Metadata Layer Infrastructure, and Data Acquisition and Data Distribution Infrastructure.
- Creation of new ad-hoc and dashboard reports for reporting and forecasting using Interactive reporting studio (Brio) and Hyperion Analyzer.
- Created queries and developed reports using Hyperion Interactive Reporting. Developed an application in which several brio documents were merged into one for one time publish on Hyperion Portal which provides users the power of interacting between several reports without opening different documents on the portal.
- Developed cubes for sales department for forecast, reporting and consolidations.
- Optimized queries with cube navigators formatted spreadsheet add-in and saved the reports as web page.
- Actively participated in defining requirements, functional specifications, designing documentations and testing strategies
- Developed applications using HFM for automation and reporting process
- Installed and set up Hyperion SQR server for DDO to establish its connection with the Essbase server to generate various financial reports.
- Deployed dashboards in Hyperion Intelligence viewer platform – iHTML, Insight plug-in, Explorer client and Designer client
- Created ODBC connection to the Relational Database for connecting Hyperion SQR ODBC module to Oracle
- Analyzed financial results and prepared trend reports to support business managers make profitable decisions using Hyperion SQR Developer and SQR Viewer.
- Used HTML procedures to generate complex reports
- Worked with Brio Portal and Demand Server to Publish reports on Web

Environment: Hyperion Essbase 7.1.2, Hyperion Reports 7.0, Hyperion Analyzer 6.5, Hyperion Planning 3.5.1, HFM, Hyperion Performance Suite, Hyperion Intelligence, Essbase Integration Services 7.1, Hyperion Strategic Finance 9, BRIO, Microsoft Excel 2000, Oracle 9i, Windows 2000, UNIX.

### Financial Corporation Client Hyperion Intelligence Developer

The client is a public held company which is operated in the southern states. The project involved development of reports highlighting the financial results of various businesses at the bank. These

financial reports give a snapshot of the various businesses enabling the managers and decision makers to analyze the business trends. Extensive Dashboards were built providing easy access to the managers and executives to various reports and Developed report scripts to populate data, which fed into the other cube.

#### Roles & Responsibilities:

- Installed and configured various components of Hyperion Performance Suite on windows server and was responsible for the development of reports and dashboards using Hyperion Intelligence.
- Worked with users to obtain requirements and design, build and deploy new EIS Brio reports.
- Created an OCE connection to connect to the Oracle database
- Publish reports to the Foundation and give access privileges to various user groups.
- Developed automation scripts for back up and Refresh of all Production Cubes.
- OLAP cubes were designed using Hyperion Essbase; data is loaded into Hyperion Essbase via batch processes to refresh cubes.
- Responsible for developing Brio reports, creating technical specifications, testing and QA of reports and support.
- Analyzed financial results and prepared trend reports to support business managers make profitable decisions using Hyperion SQR Developer and Hyperion SQR Viewer.
- Using functionality of Hyperion Intelligence and SQR, created a personalized dashboard, developed personalized report query and performed analysis.
- Modified, replaced and duplicated existing financial, marketing reports developed in Hyperion Analyzer to Hyperion SQR.
- Designed and developed various types of reports (Pivot, Tabular and Chart and OLAP Query reports) to be used by various user groups using Hyperion Intelligence.
- Performed migration of reports from previous versions to the current version of Hyperion Intelligence
- Prepared quarterly forecasts, annual budget, ad-hoc reporting and management reports in Hyperion SQR and Hyperion Intelligence by working with the business managers

Environment: Hyperion Essbase 7.1/6.5, Hyperion Intelligence 8.0, Brio, SQR, Hyperion Performance Suite 8.x, Hyperion Analyzer 7.0, Excel Add-In, MS Project, Oracle database, Windows 2003/2000

### Finance Corporation Client Essbase Analyst/Developer

The client is a subsidiary of a major financial institution, which already had a well-established Hyperion Essbase, required some minor cube additions to the existing suite of main applications for its local usage for approving loans and credits to its consumers and departmental analysis, which was successfully completed during the contract.

#### Roles & Responsibilities:

- Was involved in the installation, configuration, and administration of the Hyperion/Brio Performance Suite product packages such as Designer, Explorer, Insight Server, Intelligence iServer, Reports iServer, Brio

- Created tabular, non-tabular, master/detail system independent portable reports along with graphs and charts to present data in visual terms
- Maintained over 100 reports and updated the reports to reflect database changes.
- Models were used to analyze many business issues and to integrate the strategic planning processes. Developed user-friendly reports and graphs self-contained in financial models
- Extensively worked with Hyperion Reports and Hyperion Analyzer to generate financial reports from different Multi-Dimension Databases
- Extensively involved in the financial planning model calculations i.e. (Profit, Forecast, Marginal Profit, Elimination, Consolidation, and Headcount) using Hyperion Business Rules.
- Prepared Profitability Reports, which detail Unit Cost, Price and Volume Trends and Expense Variances over prior periods using Hyperion Intelligence explorer
- Designed and implemented batch scripts for loading data from the financial system's database to Essbase cube through data files and rule files.
- Designed users input capability to the applications maintained by Filters.
- Optimized cache settings, established user security, managed applications migration, established substitution variables and settings for dynamic time series, asynchronous processing, editing/validating scripts

Environment: Hyperion Essbase 6.2/6.5, Hyperion Intelligence 8.0, Brio, EAS 6.5.1, EIS, Excel Spreadsheet Add-In, Hyperion Analyzer 6.5, Hyperion Planning 3.3, Hyperion Reports, Windows 2000

### Major Office Retail Client

#### Oracle developer/Essbase Analyst

The client is a retailer of office supplies, business services, furniture and technology to consumers and businesses from home-based businesses to Fortune 500 companies in North America and throughout Europe. To keep track of the huge amount of data, Essbase was implemented to keep track of all the sales that were taking place in various places.

#### Roles & Responsibilities:

- Assisted senior DBA in installations and upgrades of various Oracle products
- Created SQL scripts for creating tables, views, and stored procedures, loading data into the tables
- Configured test and development servers with the help of system administrator
- Responsible for moving cubes to production server for the sales department, which used Hyperion Essbase as their OLAP server
- Installed Essbase family products in both Windows 2000/NT and UNIX environments
- Produced the functional design documents and specification for the Essbase modules
- Maintained two previous Essbase cubes and also designed and developed calc scripts.
- Involved in script writing for dynamic dimension builds and data loads
- Developed the Load Rules to automatically validate the data and feed into Essbase new structure.
- Developed report scripts to populate data, which was fed into the other cube.
- Created batch files to run calc scripts, data load and data calculations.

---

- Extensively worked with Hyperion Reports and Hyperion Analyzer

Environment: Hyperion Essbase 5.1/6.0, Hyperion Analyzer, Excel Add-In, Hyperion Reports, Oracle 8i, PL/SQL, Windows NT/2000

### **E-Technologies Client** **Database Developer**

Developed a billing and sales system that deals with Agencies, ads, scheduling, Billing, Receipts, Debit Notes and Credit Notes.

#### Responsibilities:

- Involved in Database design, design of screen layouts and report layouts
- Creating Database objects including Tables, Indexes, Clusters, sequences, roles, and privileges.
- Developed several forms in Forms 5.0, such as, master table maintenance screens, Purchase Requisitions, Purchase Order generation, Sales Invoice Preparation, Material Receipts, Material Issues Monthly salary entries, increments etc, .
- Wrote Stored Procedures, Database Triggers using PL/SQL
- Developed User Interface Screens, Master detail relations and Report screens
- Developed various Reports for the end user as per their requirements and created many reports to suit-preprinted format of the company.
- Wrote procedures to meet ad-hoc requirements to replicate data from one table to another. Also involved in integrated testing
- Backed up the databases and fixed the bugs of varied complexity in existing forms

Environment: Windows NT, Oracle 7.3.4, PL/SQL, SQL, SQL\*PLUS

### **Education / Certifications**

- Completed BS
- Certified Hyperion System 9 BI+ 9.3 Administrator professional.
