Application Servers: Web Logic, IBM Websphere and TOMCAT 4.1.18.

Testing Tools: Win runner, Load Runner, Quick Test Professional (QTP).

Others: PVCS, Terminal Services.

Hyperion Clients / Experience

Beverage Distribution Client

Hyperion Consultant

The Client is one of the world's largest brewers, with brewing interests and distribution agreements in over 60 countries across six continents. This project involved in developing and maintenance of cubes using Analytic Administration Services, which enables the company to analyze its performance.

Responsibilities:

- Developed Enabler and Key Performance Index applications.
- Implementation and maintenance of Hyperion System 9 applications.
- Developed Rules files to load data/metadata to Essbase cube.
- Optimized Data Loads and Calc Scripts.
- Involved in developing MaxL scripts for automation.
- Migrating the release from development to pre-production and then to production environments.
- Performed testing on the code and process compliance across the global team.
- Involved in Performance Tuning, to minimize data load and calculation time, using the Dense/Sparse settings.
- Modified Essbase configuration files and involved in developing customized MAXL scripts to work with all related application objects, aggregations, partitions, caches and disk volume allocations.
- Involved in the Financial Planning model calculations (i.e. Actual, forecasts, Profit and Consolidation).
- Created security filters and assigned them to users depending on responsibilities and tasks.
- Provided troubleshooting services and assistance to end-users in resolving errors.
- Monitoring server performance, restarting the services and servers.
- Involved in defining requirements, functional specifications, designing documentations and testing strategies.
- Conducted User training sessions for users on the use of Excel Add-in, Smart View, Work Space and Shared Services.

Environment: Hyperion System 9.2.0.1 Suite, Analytic Administration Service, Hyperion Planning, Work space, Financial Reporting, Web Analysis, Hyperion Application Link, Smart View, Performance Score Card, License Server, Shared Services, HFM, FDM, Analytic Server, Essbase Excel Add-In, Windows 2003, MS SQL 2003, Citrix.

Telecommunications Client Hyperion Consultant

The client is a leading telecommunication company, which provides a wide range of wireless services. The client uses the Hyperion suite of products to present the financial information to users to make better business decisions for financial analysis, budgeting and reporting.

Responsibilities:

- Supported applications deployed using Hyperion Essbase.
- Support and enhancements of G and A financial budgeting and forecasting application using Hyperion planning.
- Created load rules for dimension build automation and developed report scripts for feeds to other systems.
- Created/Updated calc scripts for different business rules.
- Developed reports and books using Hyperion Reports and Hyperion Analyzer.
- Involved in user interaction and resolved issues related to data and security.
- Involved in supporting the Applications during the close process.
- Support existing cubes, problem identification, resolution and documentation.
- Created batch scripts using MaxL for refreshing the databases.
- Optimization of Data Loads and Calc scripts according to system specifications and capabilities, to reduce runtime. Participated in testing, debugging, and error control procedures by applying test cases and analyzing error logs.
- Maintained high volume reports from company's different existing databases.
- Work with the business users on a daily basis to address their business issues.
- Involved in providing 24/7 on call production support.

Environment: Analytic Server 9.2, Hyperion Planning 9.2, Financial Reporting 9.2, Web Analysis 9.2, HAL, Windows 2003 server, Unix, PVCS.

Financial Institution Client Hyperion Developer

The client is a provider of financial services to consumers and retailers. The client offers a full range of financial products such as credit cards, personal loans, bank cards, auto loans and leases, mortgages, corporate travel and purchasing cards, debt consolidation, home equity loans and credit insurance. The project involved developing new cubes for the personal finance department using the existing Hyperion Planning, maintaining the existing Essbase cubes, creating budget and profitability reports.

Responsibilities:

- Building and maintenance of two new Essbase Cubes for Personal loans and consumer lending using Planning.
- Designed and developed new aggregate storage and block storage cubes using Essbase 7.1.

Cendien Consulting

14875 Landmark Blvd., Ste. 100 Dallas, TX 75254

<http://www.cendien.com>

- Imported data from different data sources including relational databases, excel and text file to Essbase cubes.
- Created various filters, users, user groups and their security rights.
- Modified existing outlines for addition, deletion and movement of members both through manually and used dimension build methods.
- Modified existing load rules properties to facilitate new data.
- Created batch scripts for loading data from the financial system's database to Essbase cube through data files and rule files.
- Create Rule files for multi-dimensional databases.
- Customized the various excel report templates for certain set of users.
- Involved in installation and up-gradation of Hyperion Essbase version 6.5 to 7.1,
- Extensively involved in performing DBA activities such as performance tuning the database and taking the Essbase backups.
- Worked with the Budget owners, users on getting the signoff for enhancements.
- Prepared quarterly forecasts, annual budget and management reporting by working with the business managers.

Environment: Hyperion Essbase 6.5/7.1.3, Hyperion Planning 3.5, Hyperion Reports 7.0, Essbase Administration Services 7.0, Hyperion Analyzer 7.0, Excel Add-In, ESSCMD, Oracle, Windows NT/2000, HP-UNIX.

Insurance Corporation Client Systems Analyst

The client is a property and casualty insurer in the United States. The Client has built its business around its own strengths, a huge network of company and independent brokers. The project was developed for the client's forecasting and planning cycles.

Responsibilities:

- Production support and maintenance of existing cubes.
- Loaded data and metadata from flat files through Hyperion Application Link to the Planning application using planning, flat file, and other adapters.
- Moved the metadata from planning application to Essbase cube.
- Developed Member Formulas, Calculation Scripts, and Business Rules.
- Involved in database and security refreshes in Hyperion Planning.
- Developed HAL Routines for metadata loading.
- Developed business rules for Allocations, budgeting and Forecasting.
- Created various Web forms for data entry.
- Involved in training and support of users.
- Maintenance of batch scripts and scheduling using task scheduler.
- Involved in active user interactions for regular hierarchy maintenance and trained and supported users.
- Involved in defining requirements, functional specifications, designing documentations and testing strategies.
