MKS Implementer, Aldon/CMS, EDI, Web Services.

Lawson Clients / Experience

Technologies Client
Lawson Consultant

- Responsible for upgrading client's Lawson software from version 6.1
  to 7.2, including planning, installation, setup, data conversion, interfaces,
  software modifications and enhancements.
- Managed the implementation and integration of Lawson Financial and
  Distribution modules, replacing client's mainframe-based MSA software.
  Defined MSA to Lawson data conversion rules, production and acceptance

testing environment requirements. Performed data conversion, software modifications and support, system testing and user training.

- Responsible for the integrity of the JD Edwards Database and Technical Foundation (Data Dictionary, UDC, VO, DW, Security, Menus) and change control utilizing Aldon/CMS. Designed and developed Distribution system modules using RPG/400 and JD Edwards' development standards and tools, including WorldCase, SVR, FDA, SDA,RDA, etc.
- Designed and implemented a Decision Support System utilizing ShowCase Strategy (OLAP-enabled Business Intelligence solution), providing multidimensional visualization,analysis and reporting capabilities for JD Edwards Financial and Distribution system users. Developed custom online programs and various sales and financial reports using RPG/400 and JDE development standards and tools.
- Performed Year 2000 impact analysis utilizing ADAMS/400. Installed and configured Client Access/400, NetSoft, Wall Data, ShowCase ODBC, StarSQL, Client/Server connectivity tools.
- Designed, developed and implemented Client/Server applications utilizing Microsoft Visual Basic, Access, Excel, Word, ODBC/SQL, and Client Access /400 APIs (Windows DLLs), enhancing AS/400 based legacy applications.
- Designed and implemented a Decision Support System utilizing Cognos Impromptu/Powerplay, enabling Windows based multidimensional data analysis, interactive end-user data access and reporting.
- Developed guidelines and standards for software development, introduced methodologies that resulted in increased productivity, higher quality and improved skills.
- Performed logical and physical database design, prototyping, development and implementation of distribution system modules utilizing structured design methodologies, CASE tools, including Synon/2E Application Generator.

Technologies Client
Project Leader
- Responsible for installations, modifications, upgrades, and trouble-shooting of Lawson Financial and Distribution application modules for various clients, including legacy systems to Lawson data conversions, user training and support.
- Designed and implemented a communication network to electronically send/receive billing and inventory movement information between a 3090 mainframe in LA and an AS/400 in NY. Designed and coded the interface bridge to feed the received data into the Lawson Financial/Distribution system.
- Evaluated client's business requirements and prepared detailed functional specifications. Assisted customers in selecting, acquiring and installing integrated software package systems. Interfaced with all levels of management and staff.
- Developed chart of accounts and organizational levels.

- Installed and configured Silvon Implementer software development change management tool.

Retail Client
Sr. Programmer/Analyst
- Planned and coordinated the migration process from System/36 to AS/400 along with user and programmer training. Responsible for system administration, performance tuning, and developing programming standards.
- Designed and implemented EDI Transaction Set Interpreter, Generator and Translator system using TDCC and proprietary formats with major accounts. Created and installed Telecommunication software and AS/400 PC Support.
- Designed and implemented a Transportation Domestic Consolidation System.

Retail Client
Programmer/Analyst
- Installed, customized and maintained Lawson Software application modules (G/L, A/P, Payroll), and CommercialWare Wholesale modules (Inventory Control, Sales Analysis).
- Designed, developed and implemented various applications to support existing systems and provided interface between application modules, including Sales Commission and Productivity, Insurance system, 401K management system.

Lawson Education / Certifications

State University of Technology, 1970 - Masters Degree in Computer Science, Machine automation, Computer Numerical Control (CNC) operations.
SYRIT Computer School Systems, 1985 - Certificate in Programming
SYNON training courses, 1992
JD Edwards WorldCase training courses, 1996
