Senior Lawson Developer – Cendien – Lawson Experts

Lawson Clients / Experience

Protections Client

Sr. Programmer Analyst

Supporting Lawson Administrative needs. Lawson Security laua; code promotion; Design Studio; ESS modifications; Portal Administration (bookmarks, users, groups, permissions); Lawson CASE tools.

Project Manager of the Clients Lawson ESS upgrade – using MS-Project to define requirements, target dates, resources, and project dates. HTML and Javascript files have been modified.

Software Client

Systems Consultant

Delivered training classes and consulting to clients on the following software: CASE/4GL, ProcessFlow, Reporting Services/Framework Services, and Crystal Reports.

Delivered consulting to clients on: Design Studio.

Software Client

Lawson Technical Lead

Lawson Technical Lead role converted legacy data into Lawson. The legacy data included: General Ledger, Accounts Payable, Human Resources, Benefits, Accounts Receivable and Payroll. Loaded Chart of Accounts, Accounting units; assigned Posting accounts. Assisted GL & AP users with Lawson on-line and batch programs. Loaded AP master vendor list. Lawson Conversion programs and Excel Addins were used to load the conversion files. Created GL transactions import process. Customized AP155 (Checks) by adding AP user fields. Lead Lawson Security Administrator (laua) for all users. Design Studio was utilized to modify on-line forms. The operating system was Windows NT. Lawson utilities and unix scripting were being utilized for various tasks and projects.

Current tasks include:

- New Lawson programs will create interface files for external systems. Lawson CASE/4GL tool is being used to create these programs.
- Using Design Studio to modify Lawson on-line forms.
- Modifying existing Lawson on-line and batch programs.
- Creating custom reports with CASE/4GL and Crystal Reports.

SQL server is the Lawson database utilizing TSQL.

Health Care Client

Lawson Interface Developer

Assisted client employees with testing of the interface programs. Modified and created Lawson batch interface programs. These Lawson batch interface programs sent and received flat files to/from external systems. We were using Lawson Financial tables GL, PO, CB, and AP. Lawson CASE/4GL tool was used extensively to create the interface programs. The operating system is IBM AIX. Oracle was the Lawson database and using PL/SQL.

Natural Resources Client

Lawson Developer

This was a Lawson Payroll project. We created new Lawson tables and Lawson programs to create a flat file, with payroll information. This file was then transmitted to an external system for processing of the employee bonus, stock options, and payroll changes. centers owned by St. Thomas Health Services.

Created Lawson online programs to maintain the new Lawson tables. Used Lawson Payroll tables in PR and HR. Lawson CASE/4GL tool was used extensively to create the interface programs. The operating system was IBM AIX. Oracle was the Lawson database and using PL/SQL.

Health Care Client

Lawson Interface Developer

This was a health-care project for a group of hospitals and medical centers owned by the client.

Created Lawson batch interface programs to send flat files to external systems. Used Lawson Financials tables GL, PO, CB, and AP. Lawson CASE/4GL tool was used extensively to create the interface programs. The operating system was IBM AIX. Oracle is the Lawson database and using PL/SQL.

Manufacturing Client

Crystal Reports developer.

Modified Crystal Reports for an accounting software supplied by Best Software (i.e. MAS90/200).

Entered Sales Orders entry screen and entering purchase orders.

Cendien Consulting

CENDIEN CORP: **(214) 245-4580**

<http://www.cendien.com>

Financial Institution Client **Applications Programmer/Analyst**

Supported and maintained Unix and mainframe environments. The accounting software package was Lawson Financials (AP, CB, GL, PO).

Lawson software: Lawson 8.0.1 Applications on RS6000/AIX platform – 3 years

Lawson 8.0.3 Applications on RS6000/AIX platform – 1 year

Lawson Oracle database – 3 years

PL/SQL

Lawson 4GL Tools – 3 years

Lawson Portal 3.0 – 3 years

Lawson Design Studio – 1 year

MicroFocus Cobol – 7 years

Unix Shell script – 5 years

JavaScript – 6 months

IT experience - 10+ years

Lawson in a support capacity – 3 years

Lawson Administration – 3 years

Lawson BCI – 1 year

Mercator Map Designer – 1 year

Crystal Reports – 1 year

Mainframe Software: Cobol II, COBOL/370, CICS, DB2, VSAM, JCL, TSO ISPF, Endeavor, QMF, SPUFI, SDSF, SAR, FileAid, MVS IBM.

Duties:

Extensively used Lawson Case Tools to create many Lawson interface Microfocus Cobol programs (on-line updates, batch updates, inquiries, reports, conversions, and interfaces).

Created numerous complex Unix shell scripts.

Creating Crystal Reports from Lawson tables. Creating DME calls on Lawson tables with Lawson Query Builder.

Created non-Lawson to Lawson interfaces with new Lawson technology called BCI (Business Component Integrator). These BCI interfaces automated the importing (or “adding”) of records into Lawson tables using Lawson Batch or on-line forms. Extensively used 3rd party tool Mercator Map Designer for BCI on-line forms such as AC10 and GL65.

Have experience with the following:

Lawson utilities - pgmdef, bldpgm, qcompile, import utilities (importdb, impexp),
rgndbdump, dbdef, msgmnt, libdef, workdef.

Lawson editors - led, lx

Utilized Lawson Design Studio to modify Lawson on-line forms in Lawson Applications version 8.0.3. Design Studio development was a new Lawson tool that allows modifications to on-line forms when using Lawson Portal technology.

Lawson Patches and service packs were applied to Lawson programs, tables, and to the Lawson environment. Was responsible for all deliverables in the System Development Life Cycle. Was responsible for all test plans and implementation to Test & Production environments. Extensively used mainframe TSO ISPF utilities and options, e.g. allocating, browsing, editing files; Sort utilities; comparing files.

Software: Microfocus Cobol, Unix scripts, Unix commands, Lawson Tools, Lawson Business Component Integrator (BCI), Mercator, Crystal Reports 9.0, Lawson Utilities, COBOL/390, COBOL II, JCL, TSO ISPF, MVS IBM, SDSF, Endeavor, FileAid, FTP, Animator debugging tool.

Lawson Classes: Lawson Tools I & II, Lawson BCI, General Ledger, Lawson Case

Other training: Crystal Reports 8.5 & 9.0

Retail Client Developer

Duties: Provided production Mainframe support for a Credit Card recovery system. Developed and modified CICS/Cobol system for a proprietary Credit Card recovery system. The system was used to recover delinquent credit card accounts issued by the client. Used FileAid to browse/edit files; create flat, VSAM, GDG files; and to create file view layouts. Utilized QMF & SPUFI to test SQL queries before embedding them in the Cobol programs.

Created and maintained batch Cobol II programs, JCL. Used many JCL utilities like SORT, IEFBR14, etc. Responsible for all deliverables in the System Development Life Cycle. Responsible for all test plans and implementation to Test & Production environments. Extensively used TSO ISPF utilities and options, e.g. allocating, browsing, editing files; Sort utilities; comparing files.

Software: Cobol II, JCL, MVS, TSO ISPF, ChangeMan, DB2, QMF, SPUFI, SDSF, SAR, FileAid, MVS IBM.

Various non-programming related positions.

May 1999 – December 1999

CMS, Addison, TX Developer

March 1999 – May 1999

Duties: Developed and modified CICS/Cobol system for a proprietary Credit Card processing system. The CICS/Cobol system ran on an Unix server. The CICS/Cobol software was being customized for Sears department stores in Latin America countries. Responsible for all deliverables in the System Development Life Cycle. Responsible for all test plans and implementation to Test & Production environments.

Software: CICS, MicroFocus Cobol, Unix scripts, Unix commands, Animator debugging tool.

Financial Client Developer

Duties: Developed and modified CICS/Cobol system for a proprietary Credit Card processing system. The CICS/Cobol system ran on a mainframe MVS environment. The CICS/Cobol software was modified for a CSC customer. Responsible for all deliverables in the System Development Life Cycle. Responsible for all test plans and implementation to Test & Production environments. Also, modified and created batch Cobol programs. Used FileAid to browse/edit files; create flat, VSAM, GDG files; and to create file view layouts. Extensively used TSO ISPF utilites and options, e.g. allocating, browsing, editing files; Sort utilities; comparing files.

Software: COBOL II, CICS, JCL, SDSF, SAR, FileAid, TSO ISPF.

Financial Client Developer

Duties: Developed and modified CICS/Cobol system for a proprietary Credit Card processing system. The CICS/Cobol system ran on an Unix server. The CICS/Cobol software was being customized for the client in Latin America countries. Responsible for all deliverables in the System Development Life Cycle. Responsible for all test plans and implementation to Test & Production environments.

Software: CICS, Microfocus Cobol, Unix scripts, Unix commands, Animator debugging tool.

Utilities Client Developer

Duties: Created and maintained mainframe batch COBOL II/DB2 programs to convert legacy data from DB2 tables to PeopleSoft financial system DB2 table formats. Used FileAid to browse/edit files; create flat, VSAM, GDG files; and to create file view layouts. Utilized QMF & SPUFI to test SQL queries before embedding them in the Cobol programs. FileAid for DB2 was used to verify data in DB2 tables, and to modify fields & rows as needed. Extensively used TSO ISPF utilites and options, e.g. allocating, browsing, editing files; Sort utilities; comparing files.

Software: COBOL II, JCL, TSO ISPF, DB2, SPUFI, QMF, SDSF, CICS, Animator debugging tool, FileAid for DB2.

Insurance Client Developer

Duties: Developed and modified on-line & batch programs for a mainframe healthcare system used by the clients locations across the United States. Responsible for all deliverables in the System Development Life Cycle. Responsible for all test plans and implementation to Test & Production environments. Used FileAid to browse/edit files; create flat, VSAM, GDG files; and to create file view
