Senior Lawson Developer – Cendien – Lawson Experts

Lawson Technical Skills

AS/400 -   All models of iSeries (CISC and RISC) including predecessor 3X, 34, 36, and 38
Coding: RPG (III, IV, 400, ILE), COBOL (400, ILE), CL
Utilities: ASC Sequel/ViewPoint, IBM wDSC, DBU, Hawkeye, Silvon, Aldon
Application Packages: ICC Transportation, Qualcomm, ComData, JDA, Lawson
                (Payroll/HR/Financials), Infinium (HR/Financials),GeoFuel, McCormick & Assoc.

PC/Mobile- All Windows-based platforms through P-IV; Pocket-PC
Operating Systems: MS Windows 2003, XP, 2000, NT, Windows 9X; Pocket OS
Application Packages: MS Office & BackOffice (both through current releases)
Databases: MS SQL Server, MS Access (both through current releases)
Programming/Development: MS Visual Studio.Net, VB(.Net and 6), Fujitsu
COBOL, Crystal Reports, MS Visio, MS Project, WAP/WML

Lawson Clients / Experience

Shipping / Freight Client
Lawson Consultant:

Served in capacity of Director of Software Development for the client.
- Responsible for all day-to-day software development and maintenance across all platforms. Consistently deliver practical, innovative, and comprehensive analysis, design, and application solutions.
- Daily interfacing with all levels from senior management to end-user.
- I.T. representative to senior management regarding project updates and direction and design of future projects. Manage programming staff and other consultants on AS/400 encompassing all core transportation related software packages (including truck communications, EDI, etc.) and Lawson software package (payroll, HR, financials).
- Developed and implemented lane tracking and analysis system revealing inefficiencies and imbalances resulting in reductions in empty repositioning, increased practical dispatched miles and market growth in most optimally performing lanes.
- Delivered GUI fleet tracking solution allowing dispatchers broader view of fleet locations and movements.
- Utilizing this system allowed an increase in "drop and swap" shipments keeping drivers closer to home increasing driver retention and reducing new driver training expenses.
- Consistently called upon to deliver on-demand, ad-hoc data combining user's request and my individual, experience-based, industry value-added information.Results of these efforts have reduced misrouting, increased fleet reporting accuracy, reduced inaccurate dispatching information and increased accuracy and reliability of customer invoicing and driver settlement processes.
- Developed and implemented intranet strategy for corporate office including senior management

- EIS reporting (via Digital Dashboard) and multi-platform data synchronization.
- Designed and developed strategy to replace ISP hosting services with in-house server farm to facilitate real-time data access for external and internal users.
- Developed and implemented coding standards on each platform.
- Spearheaded development and integration of handheld (Pocket PC) applications and devices.
- Manage mid-tier and web development staff.
- Perform coding on AS/400, mid-tier, and web based platforms to support staff and ensure timely delivery of product.
- Work closely with help desk staff to ensure timely issue resolution. Led training classes on specific software packages and general application processes to foster broader knowledge base of all I.T. staff.
- Interviewed potential staff and performed annual staff reviews.
- Assumed CIO and/or Network Manager responsibilities during the individual's absence.

Prior to assuming Director capacity; coding and design support as part of new system implementation converting from mainframe system to AS/400.

- Extensive coding to customize transportation software package and interfaces with Lawson financials and Qualcomm satellite communications and positioning package.
- Management and user interface during acceptance testing and design sessions. Year 2000 compliance analysis, coding, and testing.
- Relied upon heavily to draw upon transportation experiences and provide project direction. Asked to train in-house staff on software and new programmers in RPG.
- Design, coding, and implementation of internet corporate web-sites.
- Included converting existing static pages to dynamic content and individual recognition and customization modules.
- Implementation using multiple software packages and databases based upon client requirements.

Performed support maintenance and new development for the client on AS/400 platform. Utilizing base retail package designed and created custom application extensions and company/industry specific new processes.

- Worked with all aspects of the retail system from ordering, receipt, and distribution of merchandise through sales receipts, financial postings, and EIS reporting.
- Evaluated and modified modules to ensure Year 2000 compliance.
- Relied upon to provide extensive PC-based support including inter-networking and workstation application support.

Design of internet-based e-commerce system for the client, Included over 30,000 available individual component pieces. Performed process from conception and design, through development and deployment using a variety of PC and AS/400 based applications.

Complete re-engineering of intermodal system for the client. Included design of database, module structure and flow, system coding, project planning, and managed personnel coordination and supervision.

- Design and coding of dray trip creation and tracking system, midrange to mainframe interface for resource/information sharing.
- Design and coding of marketing mass price modification system allowing for "what-if" scenarios.
- User interface at all levels throughout the design and implementation process.
- Coordinated and performed enhancements to marketing system to allow multi-platform bridge interface.
- Installation of AS/400 systems and peer-to-peer network systems and AS/400 and PC based development work of client-server applications.

Retail Client
Project Team Lead/ Lawson Consultant

Technical analysis of installation of JDA Merchandising system.
- Analysis/Support of existing warehousing and financial systems to include programming modifications.
- Supervision/Staffing/Coordination of programming teams.
- Data conversion from existing merchandising package to JDA package.
- Technical support for AS/400 including daily operation and ongoing system requirements.
- Design/Develop interface between AS/400 and PC LAN Point-of-Sale system and interface between AS/400 and PC-based Arthur Planning System.

Cargo/ Shipping Client
Lawson Consultant

Analysis and programming of system conversion from IBM 3090 to AS/400. Installation of application packages on various AS/400's.
- Designed and installed custom modifications and provided technical assistance to those applications packages.
- Custom design of equipment relocation system the client.
- Design/Modification of member tracking system using PC-based Realia Cobol/CICS.
- Performed data conversion from 3090 to AS/400.
- Supplied system configuration, tuning and support.
- Provided local and off-site communications support for 1 local and 8 remote AS/400's.

Lawson Education / Certifications

Bryan Institute, Arlington, Texas,
  Major: Computer Programming - Class Valedictorian (GPA 99.74)

CERTIFICATIONS
IBM Certified Specialist – AS/400 RPG IV Developer
IBM Certified Specialist – AS/400 RPG IV Programmer
Microsoft Certified Professional (MCP) – Completing MCSD.NET and MCDBA
