- User Defined Transformation)
- Extracted data from CSV files and populated in to stage table on DWH.
- Creation of ETL Processes for the added new Customer Subject areas , Develop Data Extraction , Transformation and Loading Program using integration services.
- Expertise in ETL design, and development by applying business methodology.
- Provided end-user support in setting up maintenance files.
- Handling post-live user queries and production support.

Environment: Oracle Portal, Oracle Forms 10g, Reports 10g, SQL, PL/SQL, Stored Procedures, Triggers, 10g Database, Discoverer 4i, Oracle Warehouse Builder 10g R2, Linux, Windows XP and TOAD.

Manufacturing Distributer Client

Lead Analyst Programmer

Quality Assurance (QA) System

This project is a conversion from Access Database to Oracle Forms 10g and Reports 10g in Oracle 10g Database.

Responsibilities: (Project Lead)

- Gathered requirements from user and preparing the system specifications and its data flow diagram.
- Preparing program specs of its program to be developed that includes reports, maintenance screen, data entry screen, and batch programs and ADHOC reports.
- Develop customize forms for Data Entry and some maintenance screen.
- Successfully tested and converted over 35,000 records from legacy system into Oracle customize table in both test and production environments using SQL Loader.
- Developed batched program and ADHOC reports for month end processing.
- Customize reports to cater the user requirements including audit trail reports.
- Provided end-user support in setting up maintenance files.
- Handling post-live user queries and production support.

Environment: Oracle ERP Manufacturing and Billing Module Released 11.5.9

Oracle Forms 10g, Reports 10g, SQL, PL/SQL, Stored Procedures, Triggers, 10g Database, Discoverer 4i, UNIX-SUNS 5.9, Windows XP and TOAD.

IT Consulting Client

Sr. Analyst Programmer

Maintenance of the following Oracle Financials Modules for there client:

Oracle Purchasing

Oracle Account Receivables

Oracle Payables

Oracle Fixed Assets

Cendien Consulting

Senior Oracle Developer

Call us today to schedule this resource.

CENDIEN CORP: **(214) 245-4580**

<http://www.cendien.com>

Responsibilities:

- Customize the CUSTOM.pll base on user request such us make some field's mandatory and validate base on a certain criteria.
- Develop customize Oracle forms 6i, reports 6i and discoverer 4i, unix scripting to cater user's requirements.
- Develop triggers; SQL-/PL-SQL scripts for the audit trail reports.
- Develop audit trail reports using SQL, Oracle Reports 6i or Discoverer base on report layout provided by user.
- Customize the PO approval workflow and the Requisition approval workflow base on the user request to meet business requirements.
- Customize the credit limit authorization workflow for the Oracle Account Receivable in order to meet business requirements.
- Provided end-user support in setting up user responsibilities, menus, request groups and some flex values.
- Investigated and fixed functional problems reported by users.
- Conducted various functional tests either to prove concepts or to verify fixes.
- Handling user queries and Production support.
- So far I have gained extensive experience in investigating numerous Oracle bugs pertaining to Oracle PO, AR, AP and FA.

Environment: Oracle ERP Financials Modules Released 11.5.9 Later Upgraded to 11.5.10.2 (PO, AR, AP and FA)

Oracle Forms 6i/9i, Reports 6i/9i, SQL, PL/SQL, Stored Procedures, Triggers, WorkFlow, Discoverer 4i, ADI, UNIX-SUNS 5.9, Windows XP/NT, TOAD and SQL Tools.

Banking Corporation Client

Lead Analyst Programmer

This project is a conversion from Visual Basic to Oracle Application.

Responsibilities: (Project Lead)

- Gathered requirements from user and preparing the system specifications and its data flow diagram.
- Preparing program specs of its program to be developed that includes reports, maintenance screen, data entry screen, and batch programs and ADHOC reports.
- Develop customize forms for Data Entry and some maintenance screen.
- Successfully tested and converted over 65,000 records from legacy system into Oracle customize table in both test and production environments using SQL Loader.
- Developed batched program and ADHOC reports for month end processing.
- Customize reports to cater the user requirements including audit trail reports.
- Provided end-user support in setting up user responsibilities, menus, request groups and some flex values.
- Handling post-live user queries and production support.

CENDIEN CORP: **(214) 245-4580**

<http://www.cendien.com>

Phase 2 of Invoice Payment System

The main purpose of this system is to facilitate the prompt payment of all invoices that includes Equipment (Leasing or Metering) and Maintenance Contract (Supply/Install).

Responsibilities: (Project Lead)

- Develop additional data entry screens and some maintenance screen.
- Change all the programs done in phase 1 to cater the new set of books being implemented by the Oracle ERP such as GL, AP and FA.
- Update the program specs of each program to reflect the changes done.
- Developed additional triggers, SQL/PL-SQL stored procedure and function and some batched program.
- Customize additional reports for a certain group of users including some reports for intellistor

Phase 2 of Oracle Fixed Asset (FA)

Responsibilities:

- Developed additional PLSQL stored procedure and function and some batched program.
- Customize additional reports for the users including audit trail reports and reformat some reports for intellistor.
- I'm responsible for the development of the reconciliation program between Oracle Fixed Assets and the Oracle General Ledger.
- Customize reports for a certain group of users for intellistor.

Mortgage Client

Project Lead

- Gathered requirements from user and preparing the system specifications and its data flow diagram.
- Preparing program specs of its program to be developed that includes reports, maintenance screen, data entry screen, and batch programs and ADHOC reports.
- Develop transaction data entry screen, some maintenance screen and reports including the audit trail reports.
- Successfully tested and converted over 30,000 records from legacy system into Oracle customize table in both test and production environments using SQL Loader.
- Developed batched program and ADHOC reports for month end processing.
- Developed utility program to export data into a text file and ftp to a specified location for another system to pick up.
- Provided end-user support in setting up user responsibilities, menus, request groups and some flex values.
- Handling post-live user queries and Production support.

Oracle Purchase Order (PO)

Responsibilities:

Cendien Consulting

14875 Landmark Blvd., Ste. 100 Dallas, TX 75254

Phone: **214-245-4580** Fax: **972-559-1184**

CENDIEN CORP: **(214) 245-4580**

<http://www.cendien.com>

- Develop a host program to import items from legacy system to Oracle user defined temporary table then validate each record before it will be inserted into the Oracle Purchase Order Items table (MTL_SYSTEM_ITEMS_INTERFACE).
- Enhance the host program to import requisitions from legacy system to Oracle table (PO_REQUISITIONS_INTERFACE) base on the user requirements.
- Customize the PO approval workflow and the Requisition approval workflow base on the user request to meet business requirements.
- Develop a host program to import orders from legacy system to Oracle user defined temporary table then validate each record before it will be inserted into Oracle Purchase Order tables such as PO_HEADERS_INTERFACE and PO_LINES_INTERFACE.
- Develop a hose program to export orders from Oracle Purchase Order to legacy system.
- Enhance the host program to import receipt from legacy system to Oracle user defined temporary table then validate each record before it will be inserted into Oracle Purchase Order tables such as RCV_HEADERS_INTERFACE and RCV_TRANSACTIONS_INTERFACE.
- Develop a host program to export supplier from Oracle Purchase Order to legacy system.
- Gathered requirements including report layouts for the customized reports from the user.
- Develop reports using SQL or Oracle Reports 6i or Discoverer to cater the user requirements mention above.
- Develop triggers; SQL-/PL-SQL scripts for the audit trail reports.
- Provided end-user support in setting up user responsibilities, menus, request groups and some flex values.
- Handling user queries and Production support.

Oracle Accounts Receivables (AR)

Responsibilities:

- Research on data conversion methodologies between legacy account receivables system and Oracle Account Receivables requirements.
- Developed loader scripts and validation programs for data conversion of AR legacy system to Oracle AR.
- Successfully tested and converted over 100,000 legacy accounts receivable data into both test and production environments.
- Gathered requirements including report layouts for the customized reports from the user.
- Developed and tested Oracle reports, SQL/PL-SQL scripts, and Oracle forms.
- Developed batched program, triggers for audit trail reports and ADHOC reports for month end processing.
- Customize reports to cater the user requirements and provide audit trail reports.
- Customize the AR Credit Management Application Process Workflow to implement customize credit decision in order to meet business requirements.
- Develop some customize reports for intellistor.
- Assisted in the initial Oracle AR setup of the Development and SIT environment.
- Investigated and fixed functional problems reported by users.
- Conducted various functional tests either to prove concepts or to verify fixes.
- Responsible for the migration of all customized program such as SQL/PL-SQL scripts, forms and reports and etc. to production environment.

Cendien Consulting

14875 Landmark Blvd., Ste. 100 Dallas, TX 75254

- Provided end-user support in setting up user responsibilities, menus, request groups and some flex values.
- Handling post-live user queries and production support.

Oracle Accounts Payable (AP)

This project is a conversion from Tandem Accounts Payable System to Oracle ERP Accounts Payable Module.

Responsibilities:

- Gathered requirements including report layouts for the customized reports from the user.
- Developed batched program, triggers for audit trail reports and ADHOC reports for month end processing.
- Customize reports to cater the user requirements and provide audit trail reports.
- Develop some customize reports for intellistor.
- Successfully tested and converted the records from TANDEM ACCOUNTS PAYABLES System into Oracle AP Interface tables in both test and production environments using SQL Loader.
- Investigated and fixed functional problems reported by users.
- Conducted various functional tests either to prove concepts or to verify fixes.
- Responsible for the migration of develop reports and SQL/PL-SQL scripts and register to Production environment.
- Develop MS Access programs to populate invoice lines from different department to Oracle Interface tables.
- Provided end-user support in setting up some flex values during training session.
- Handling post-live user queries and Production support.

Oracle General Ledger (GL)

This project is a conversion from Tandem General Ledger to Oracle ERP General Ledger Module.

Responsibilities:

- Successfully tested and converted the records of over 50 subsystems from TANDEM PBLGL System into Oracle GL Interface tables in both test and production environments using SQL Loader.
- Gathered requirements including report layouts for the customized reports from the user.
- Developed batched program, triggers for audit trail reports and ADHOC reports for month end processing.
- Customize reports to cater the user requirements including audit trail reports and for intellistor.
- Investigated and fixed functional problems reported by users.
- Conducted various functional tests either to prove concepts or to verify fixes.
- Responsible for the migration of develop reports and SQL/PL-SQL scripts and register to Production environment.
- Provided end-user support in setting up some flex values during training session.

Environment: Oracle ERP Financials Modules Released 11.5.8 then upgraded to 11.5.9 (GL, AR, AP, FA and some conversion from legacy system to Oracle Application)
