Senior Oracle Developer – Cendien – Oracle Experts

Oracle Professional Services

Information systems professional with 18 years experience, accompanied by 15 years in software development life cycle, and 10 years supervisory experience in Project Management, 12 years experience in Practitioner and Facility Medical Billing (837, 835). I possess an exceptional work ethic with my best work performances in the areas of software development, software interfacing and customer service. I have extensive experience in EDI data cleansing analysis and data preparation for database input and statistical output use. Developed and maintained proprietary business software for paper workflow processes. Automated those processes for Accounting, Marketing, Sales and Customer Service departments in previous employment. Lead analysis on accounting system conversions and knowledge in Back-office systems conversions. Ability to handle a large number of client accounts to negotiate standardization of input and output data file formats. I have 7 years experience as a Macess System Administrator.
