- Complete and concise written technical data conversion documentation as part of project deliverables.
- Responsible for communicating design requirements to the end customer.
- Extensive use of People Tools 8.49, App Designer, and Aqua Data.
- Extensive use of SQL for data mining legacy Oracle database.

Engineering Client

Senior Database Administrator / Analyst

- Reverse engineered a multi-terabyte Oracle database providing baseline package traceability for the United States Air Force Personnel Center.
- Responsible for creating SQL queries to extract data and provide clear text documentation to analysts for data decryption.
- Creation and maintenance of a growing MS Access database to house the myriad Oracle package data paths.
- Assumed current position and was immediately charged with the creation of an MS Access database including all user interoperability.
- Data manipulation and presentation using MS Excel spreadsheets to provide seamless statistical and analytical information to end users.
- Assist and champion a team of data analysts allowing project timeline completion

Environmental Relations Client

Environmental Engineer

- Responsible for software testing, database designs, help desk/call center procedures, and on-site technical support visits (primarily to US Air Forces Europe).
- Computer and database (MS SQL server and Oracle) support activities.
- Responsible for network troubleshooting and problem resolution.
- Maintain a Secret security clearance and a great understanding of DoD policies and procedures.
- Completed a 1.5 year contract with USAFE to provide on-site data migration support from existing legacy databases (SQL Server7) to an enterprise-wide Oracle based web application (EESOH-MIS).
- Assisted in building and testing a new Access based migration utility to extract data from Command Core (Oracle database) for eventual inclusion in an Oracle web based environmental system.
- Provide daily tier 2 help desk support to all AF bases that are currently running EMIS for hazardous materials management.

HealthCare Client

Bioenvironmental Engineering Technician

- Manage and maintain Oracle database on HP-9000 box running HP-UX v11.
- Serve as Network Administrator for Windows 2000 server, supporting over 150 users.
- Account for over \$250,000 worth of computer inventory and equipment, conducting audits and maintaining inventory list.
- Conduct recurring training to staff of 30 as the Training Manager for Command Core Database.
- Create, develop and maintain Web site as the Webmaster for the USAF installation.
- Consult with external contractors such as TRW and Northrop Grumman on their contracts supporting the base and USAF Europe.
- Reduced amount of negative reviews received by the base through implementation of numerous projects bringing the base into the age of information technology.
- Operational Database: Installed and configured the first Operational Command Core Database, reducing effort, increasing efficiency, and meeting the Command's database requirements. In less than three months had server in production, client machines installed, and personnel trained. Earned accolades from Health Services Inspection team.

Oracle Education / Certifications

Microsoft Certified System Administrator (MCSA)

Bachelor of Science in Management / Computer Information Systems
