Peoplesoft Enterprise Supply Chain Management v8.0/8.4/8.8/8.9

PeopleSoft Enterprise Supply Chain Management (SCM) provides a cohesive yet flexible solution for the synchronized supply chain, driving efficiencies in cost savings over your entire supply chain—including your plan-to-produce and order-to-cash business processes. Enterprises can streamline and reinforce best-practice procurement activities, aggregate and leverage their considerable purchasing power, and optimize and create strategic relationships with key suppliers by SRM products. PeopleSoft Enterprise Inventory is a flexible, comprehensive inventory management system that enables you to increase your inventory accuracy and customer service levels and, at the same time, reduce your carrying costs, labor costs, and inventory write-offs. PeopleSoft Inventory helps you make faster, more accurate decisions, which is critical in today's complex global inventory environments.

Roles:

- Developed new features using Application Engine & Peoplecode in Receiving, Putaway, Replenishment, Depletion, Purchase Order and Sales Order.
- Developed Credit available features in OM online and batch process.
- Member of team involved on 8.9 enhancements and design change in Inventory.
- Developed and customized various SQR's
- Provided software development & production support for Inventory, Cost Management, Order Management and Procurement at v8.x
- Handle performance issues related with PeopleCode, SQR and Application Engine.
