Senior PeopleSoft Developer – Cendien – PeopleSoft Experts

PeopleSoft Professional Services

Software developer specializing in PeopleSoft and business intelligence systems, the databases behind them, and the peripheral systems that interface to them. In my 10 years of experience, I have successfully completed implementations, upgrades, and major customization projects in the fashion, health care, high-tech, manufacturing, and service industries.

PeopleSoft Technical Skills

- My core areas of business knowledge include Financials, Supply Chain, & HCM.
- I have broad and extensive experience with most PeopleSoft development and reporting tools and middleware.
- Additional technical skills include most database platforms such as Oracle, SQL Server, and MySQL
- PHP is a open source language for web based applications that I have worked with also.
- Education

PeopleSoft Clients / Experience

Manufacturing Company
PeopleSoft Consultant
Engineered a Data Warehousing Solution
- Designed and constructed a SQL Server based data warehousing system to give the customer a 360 degree reporting view of their supply chain. The resulting near real-time reporting on supply and demand pipelines enabled the customer to make much improved strategic business decisions in the relentlessly competitive retail industry.

Growing Retail Manufacturer
PeopleSoft Consultant
Researched Data Structures
- This company was quickly out growing its own in-house order management and sales & marketing systems. While they implemented a Cognos data warehousing solution, they hired me to dive into the order management system and determine how their sales order and shipment data could be accurately transformed into the Cognos system. The result was a process to transform the existing systems' data into a format that could be easily consumed by the Cognos system, and made available to the sales and management teams for analysis.

Automotive Manufacturer

PeopleSoft Consultant
- Reduced Costs and Developed Analytical Capabilities
- Architected and developed a 100% custom freight payment and cost management system in PeopleSoft to meet the client's unique requirements. The system featured advanced analytical capabilities used for improving efficiency and reducing expenses.
- Implemented Third-Party Logistics Interfaces
- This manufacturing customer wished to outsource their physical warehouse to a third party company specializing in such business. I was hired to build interfaces between the customer's PeopleSoft Order Management & Inventory system and the third-party's Picking/Packing Logistics system. The interfaces have run with bomb proof reliability, allowing the customer to focus more energy on their core business.

Fashion Accessories Manufacturer
PeopleSoft Consultant
Stabilized a PeopleSoft System
- Stabilized a PeopleSoft Financials & Supply Chain system recently upgraded from version 7.53 to 8.8.
- Developed software modifications to save thousands of dollars per month in EDI back charges.
- Recommended PeopleSoft usability enhancements to boost user productivity and efficiency.
- Created Workforce Efficiency Tools at PeopleSoft, Inc.
- Designed, developed, and delivered an implementation management product called the Setup Manager through two releases.
- Guided ideas and designs from concept through release with internal groups including Strategy, Usability Engineering, Documentation, and Quality Control.
- Promoted, demonstrated, and provided training for the Setup Manager to developers, consultants, customers, and support personnel.

Manufacturing Client
PeopleSoft Consultant
Implemented PeopleSoft Systems
- In Taiwan - Provided technical and functional leadership to a project with the purpose of delivering a fully operational PeopleSoft Supply Chain system to a brand new factory in an international, multi-cultural environment.
- In New York - Coordinated and conducted a Conference Room Pilot for a Fortune 500 company's Environmental Products Division. The pilot that showed how PeopleSoft could be used to link four manufacturing plants in three countries together on a single instance of PeopleSoft and convinced management to proceed with the 5 million dollar project.
- In Ohio - Directed a team of four developers to engineer PeopleSoft customizations for the purpose of reducing manufacturing costs and improving plant floor operating efficiency. The customizations included a shop floor to PeopleSoft interface and a container tracking system for inventory, both designed from scratch.

Software Manufacturing Client

PeopleSoft Consultant

Developed Software Extensions

- Researched, designed, and deployed PeopleSoft extensions to greatly improve the client's operating efficiency in Financial and Human Resource operations.
- Enabled single sign-on for PeopleSoft HRMS and Financials using the client's WebLogic Portal and LDAP servers.
- Conducted an assessment for the case to implement PeopleSoft EPM/Data Warehousing.

Health Care Client

PeopleSoft Consultant

Administered Changes to PeopleSoft

- Improved a highly customized PeopleSoft Accounts Receivable and Billing system.
- Advised management on PeopleSoft customizations and best practices.

PeopleSoft Education / Certifications

Bachelor of Science, Mechanical Engineering.
