Technologies Client

PeopleSoft Managing Consultant

- Worked at Exult (BP/Amoco outsourcing of Payroll Processing) and Burlington Resources (Financials outsourcing) client sites as Technical Lead, responsible for managing a team of support personnel as well as major upgrade teams and was point of contact for the client. Worked in PeopleSoft HR, Financials version 7.02 at both sites. Ongoing training includes Oracle DBA.
- Managed 10 technical consultants supporting PeopleSoft version 7.02 Payroll, 5 of which were engaged in merging payroll data from the client and other companies acquired through merger. The client had highly customized system, approximately 90% custom, migration work to bring client back closer to PeopleSoft vanilla. The client is a Global Payroll system, on all continents and in most countries. The client worked in batch processing of Payroll jobs on Sun UNIX systems and NT Servers. PeopleSoft Payroll was multi-platform due to company merging with another. The other 5 consultants were working strictly on the Version 8 upgrade. My oversight was of both teams.
- Trained technical leads to manage consultants, deal with consultant issues, both personal and professional, and tools to manage resources. Responsible for evaluation of same personnel.
- Provided clients with weekly status reports, provided input in meetings not just in PeopleSoft, but in areas of expertise. Provided numerous UNIX solutions that benefited clients in time and material savings.

Software Client

PeopleSoft Senior Consultant/Principal

HR/Financials 7.52, Commerce One, ActiveWorks

- I provided PeopleSoft support in Crystal, SQR, SQL, and customization as well as assisting operations in identification of patches required to correct client issues. I was trained in Commerce One B2B application as well as interface development for web applications in ActiveWorks.
- I provided ongoing leadership and assistance to consultants, OJT as required, to bring consultants up to par in areas where skills were deficient.
- I worked in MS/SQL Server 7 and Oracle 8.0.5 environment, including developing custom scripts and working with DBAs on DB issues relevant to PeopleSoft.

Clothing Manufacturing Client

PeopleSoft Staff Consultant

PeopleSoft 6.0 AP/AR/GL

- Client required critical assessment of 6.0 version of software to achieve Y2K readiness and to determine requirements to bring software to most current level of 6.0.

Manufacturing Client

Cendien Consulting

PeopleSoft 7.5 HRMS (Payroll) COBOL Support

- I provided support on custom COBOL programs that had been developed for use by Compaq. I provided sizing assistance with array tables in Time and Labor and Payroll with Prior Period Adjustments modules. I researched, recreated and corrected errors that occurred during production runs. Additionally I researched what various COBOL programs did under defined situations as well as clarified selections and actions of COBOL programs.

Utilities Client Technical Lead

PeopleSoft 7.5 AP/AR/OM Select Implementation

- As the Technical, I assisted in identifying network and system errors and provided solutions. I also assisted in identifying data issues in the conversion of Order Management, Billing and Purchasing and A/R. I also provided assistance and mentoring a shadow on technical issues including customizations and modifications to Application Engine programs, SQR customizations, and applying fixes.

Resort Client Staff Consultant

PeopleSoft 7.5 HRMS (HR & Payroll) Implementation

- I was responsible for producing legacy labor reports, using SQR, to resolve weekly labor issues. I also created an SQR report that compared a particular week and year to date, to that same week in the previous year and year to date. I was responsible for resolving an AIX UNIX Server printing issue that had been outstanding for several months, which had reached a critical point. I have contributed to the management of client education by setting up remote queues on their Unix Server and creating detailed, I also took the time to educate the client's UNIX personnel on the procedures.

Healthcare Client Unix Administrator Consultant

- Unix Administrator supporting Digital Unix and IBM AIX systems in the Health Care industry for a county health care system. Worked in TCP/IP networking, printing, Novell and NT servers and clients as well. Functioned as a Novell and NT administrator.

Marketing Client Senior Programmer Analyst

- Provided mentoring and supervision of junior programmers, worked on the clients rewards program, debugging, rewriting existing applications, designing and writing new applications. The client was on an IBM mainframe running DOS/VSE.

Professional Client

Consulting Programmer

- Consulting programmer doing customizations to the client's Payroll and Human Resources software for an international company that processed payroll at their regional sites based on client uploads. I worked hand in hand with sales, account management, and project managers in all phases of installation and customization of PC based products. I have done due diligence, discovery, training and support.

Health Care Client

Software Consultant

- Provided Consulting services to local mental health agency, PC support, AIX Unix consulting and Payroll and Human Resources software consulting services for Ross Systems and DB2 clients.

Manufacturing Client

Senior Applications Analyst

- I was a payroll product lead in a support environment for an international Payroll/Human Resource software provider that worked primarily with DEC equipment. I wrote custom programs, updated systems, assisted clients with problem resolution, and trained the clients in use of the Payroll products. I also did custom reporting on both flat file structures and relational databases. Provided development with customizations later rolled into releases, as enhancements, bug fixes, and new products.

Telecommunications Client

Senior Applications/Systems Programmer/Analyst

- I worked the entire development/installation life cycle from identification of a need, layout and specifications, coding, testing, installation and training of the users. I designed what became the industry defacto standard for the interface of Automated Response equipment to Billing computers. Installed Pathworks network, DEC hardware, configured and maintained PC's.

Government Client

Systems Analyst/Logistics Eng. /Packaging and Preservation Specialist

- I worked as an applications analyst, supporting Packaging and Preservation as well as general support for the Logistics Department. I was recognized as the ILDF (Integrated Logistics Data Format) expert in the company, and was responsible for assuring the quality and integrity of delivered data to the US Air Force.
