Shipping Corporation

Senior PeopleSoft Consultant

Assisted The client in designing a strategy to consolidate PeopleSoft HR modules (create shared services for all companies within The client) at their six subsidiaries into one upgraded PeopleSoft HR 8.3 module. Designed, developed conversion SQRs and helped The client by designing procedures and methods for technical development at their different subsidiaries spread over the entire country. Helped client in understanding the configuration table setup in HRMS 8.3.

Communications Client
Senior PeopleSoft Consultant

As a senior consultant, worked with client implementing their Benefits Administration module of PeopleSoft, integrated it with interactive voice response system (IVR), analyzed, designed and coded SQRs for creating interfaces between different providers like health insurance companies and PeopleSoft.

Engineering Client
Senior PeopleSoft Consultant

Worked for a mid-size engineering company as a technical team lead for PeopleSoft Projects and the Time & Labor module. Helped develop project plans, test strategies, functional requirements and worked extensively to code their functional requirements. Assisted the client by identifying and developing customization requirements and standardized guidelines for implementing these customizations. Helped test integration between different financial modules like Projects and Billing. Also assisted the PeopleSoft HRMS upgrade team to troubleshoot their problems encountered during upgrade from PeopleSoft HRMS version 6.02 to PeopleSoft HRMS version 7.5.

Manufacturing Client
Senior PeopleSoft Consultant

Worked with PeopleSoft financial (version 7.5) modules like General Ledger, Projects, and Asset Management etc. Analyzed, designed, developed and implemented conversions & interfaces between different legacy systems and various PeopleSoft modules using SQRs and SQL Loader.

Analyzed, designed, developed and implemented a thin client based interface for weekly time entry between PeopleSoft and client's corporate intranet using visual basic scripts, Java PeopleSoft provided JMAC API, ASP and HTML. This intranet based thin client interface is used by about 10,000 client personnel spread across the entire country on a weekly basis. This system also integrated with their PeopleSoft security tree. Also developed a SQR for synchronizing employee data between web-based temporary time entry records and PeopleSoft HRMS records.
