Cendien: **(214) 245-4580**<http://www.cendien.com/apps/sap/>

Data Migration:

- Update Material Price Lists and Customer Master Using LSMW.
- Uploaded Material master data using LSMW.

Huntsman Polyurethanes & Huntsman Advance Materials, Houston, TX**SAP – ABAP/4 Consultant****March 2004 –Jan 2007**

Environment: SAP R/3 4.6C, ABAP/4, Windows NT

Huntsman is a global manufacturer and marketer of differentiated and commodity chemicals. Its operating companies manufacture basic products for a variety of global industries including chemicals, plastics, automotive, aviation, footwear, paints and coatings, construction, technology, agriculture, health care, textiles, detergent, personal care, furniture, appliances and packaging.

Originally known for pioneering innovations in packaging, and later, rapid and integrated growth in petrochemicals, Huntsman today has 11,300 employees, 57 operations in 22 countries and had 2005 revenues of \$13 billion.

Role and Responsibilities:

- Provide technical programming in support of the development of global and regional business process problems and opportunities. Discuss recommendations with the Business Application Analysts.
- Analysis of the specifications provided by the Business Application Analysts and preparing Technical Specifications
- Created Data migration Interfacing Programs Using BDC and LSMW.
- Created Tables, also created Table Maintenance Generators for those tables.
- Applying OSS Notes as per business Requirement
- CATT scripts were recorded to assist in data migration.
- Finalize test scripts and perform, validate results from integration & regression testing.
- Responsible for preparation of End-User documentation.

Interfaces:

- Created SAP/Lotus Pricing Interface: A 2-way interface is created to pass the required data to/from the Lotus Notes and SAP system.
The special pricing database is hosted on Lotus Notes. This is interfaced with SAP, as the approval process is carried out on the Lotus Notes side.

Data Migration:

- Loading Customer master and material master data using LSMW (LEGACY SYSTEM MIGRATION WORK BENCH) Into SAP System.
- Creating a BDC for uploading Material Master details from legacy system to Sap System, by identifying all screens, fields and functions codes and finally submitting the BDC to the system using SESSION Procedure.

Cendien Consulting

14875 Landmark Blvd., Ste. 100 Dallas, TX 75254

Phone: 214-245-4580 Fax: 972-559-1184<http://www.cendien.com>

- Creating a BDC for uploading Info record details from legacy system by identifying all screens and submitting BDC table to the system using CALL TRANSACTION method.

XML Output Processing:

- The output Processing is designed to produce XML files(Is Used in XSL-FO Documents and Jet Forms)
The translated file passed to Jet Forms for printing.
Following objects were created for the above object
Idoc Structures, BAPI (Remote Enabled Functional Module), Business Object.
ALE Interface—Transaction BDBG allows to generate the ALE interface for BAPI functional module.
Configured ALE Distributional Model.
Output Processing Program—will extract the required data and pass it to the Idoc Segments.

SAP Smart forms:

- Created Work-Orders form.
- Created excise Invoice form (Layout and print Program).

Sap-Scripts:

- Modified the existing Layout Set to get the Company Header and LOGO, Supplier address, Delivery address, Total Purchase Order Value and General Terms and conditions.
- Made use of SAP Standard Report Program RSTXLDMC to upload TIFF files (for logo) and display as Standard text.

Performance Tuning:

- Analyzed the existing Developed programs, changed the code to improve Performance
- Using Runtime Analysis analyzes the performance of program and Function Modules created in ABAP.
- Using Extended Syntax Check to reduce the unnecessary information in program.
- Using SQL Trace, Runtime analysis for the performance Testing.

Reports:

- Certificate of Analysis: This is an interactive report that displays the results of different test performed for quality assurance for different materials on choosing a particular material it call a script (Certificate of Analysis).
- Modified standard Transaction QA33 As per the business requirement
SAP QA33 transaction lacks necessary functionality then created new custom Z transaction(ZQA33) and also added additional functionality to print inspection lots from custom transaction itself and added additional functionalities to the transaction.
- Created Inspection Lot Result Sheet. This report contains results of a laboratory analysis for a specific sample.
