- Setup Port Definition, RFC's, transport, monitor system performance
- Assigned to work with EDI, IDoc's, ALE, RFC, BDC configuration and ABAP/4 CMOD, SMOD development as needed.
- Required to setup purchase orders with trading partners from Material Management, and sending PO's, 850's via EDI.
- Required to setup the receiving of order confirmation in two forms, first the 997, then the 855, and sending of our 997 out, after receiving the 855.
- Setup in UNIX file, trading partners Network Name, Test Mailbox, Test Qualifier, Production Mailbox, Production Qualifier.
- Setup in SAP, Partner Profile, Message Control, Outbound Parameters, Inbound Parameters, Output Determination, etc.
- Created and modified interfaces that would display IDoc's, IDoc Status, X12's Segments, Fields, etc.
- Assisted on the Mapping using Mercator, and SAP Workflow.
- Called and discussed with vendors the EDI process as it was tested in QA.
- The company had the option to buy a software package that performed certain tasks, making some of the work easier for the developers. The software package was not written in ABAP/4.
- To save the company money, from buying this software package, I prepared an ABAP/4 dialog application that would perform the exact same tasks as the software package. The ABAP/4 application I prepared would display SAP screens, showing all server directories and files. By clicking on a directory, it would expand and display its directories and files. By clicking on a file, it would open and display the contents of that file. By selecting a sub-menu option (Transfer), the file would be transferred into a selected directory in either the users PC or a Server.
- The application was created to display, change, add, or remove any vendor in the UNIX Files, without the user needing to know any UNIX commands. The application would also display 850, 855, 856, 997, X12 Files on an SAP screen.
 - Assisted in workflow setup.
